\$2.00 Per Year

FARM TRENDS

A summary of market
and commodity news
for the past week

by Dick Wanner

Fertilizer — A Status Report

"The fertilizer situation in Lancaster County looks bleak for at least a year," we were told Friday morning by John Hoffman of Lancaster Bone Fertilizer. "My suppliers have cut back 40 percent on the amount of phosphate I can buy. It looks like I'm going to have to ration fertilizer sales to my customers."

Urbanites and metropolitan newspapers may soon be discussing the price of fertilizer as vigorously as they were once discussing the price of beef. A consumer boycott of lawn fertilizers would probably be welcomed by farmers, however.

Shortages of fuel, raw materials, electricity and transportation are all working to compound the aggravation felt by the industry from Phase 4 price controls. Hoffman said Phase 4 is hurting U.S. farmers by keeping the domestic price of fertilizer pegged at a level far below the world market.

"Our selling price for super phosphate here in the U.S. is limited to \$60 a ton," Hoffman said. "Foreign buyers are willing to pay \$85. Naturally the big companies are going to sell as much as they can on the export market."

One solution to the price problem would seem to be eliminating exports, but Washington is very reluctant to do that. This country's reputation as a reliable trading partner was considerably tarnished this year when soybean exports were cut off. The administration doesn't want U.S. goods to lose any more of their lustre on world markets.

Lifting price controls to free movement on domestic markets seems the more likely course of action. U.S. Agriculture Secretary Earl Butz has told the Cost of Living Council that he wants price controls on fertilizer lifted promptly. "Otherwise," he warned, "I fear the crop yields and production will be reduced in 1974 relative to that which is needed."

A fertilizer shortage would increase domestic food costs again, and probably result in curtailed food exports. One of the keystones in the administration's foreign policy is to lower our balance of payments deficit with food sales abroad.

Ephrata, Lampeter-Strasburg . . .

Competition Keen At 2 Local Fairs

Clear skies and warm temperatures helped draw crowds of spectators to both Lancaster County fairs which opened this week, Ephrata and Lampeter-Strasburg. The crowd of 75,000 who gathered Wednesday night to watch the parade in Ephrata was said to be the biggest in the 55-year history of that event.

Lampeter-Strasburg Results

The first winner in the Lampeter fair was 10-year-old Tim Hess, Lancaster RD2, who took grand champion honors in the Baby Beef Show on Wednesday. Tim's steer was a three-way Angus - Charolais - Shorthorn cross. Tim is the son of Mr. and Mrs. Gerald Hess.

The reserve champion steer was shown by Joanne Shank 12-year-old daughter of Mr. and Mrs. J. David Shank.

Joanne was also named senior showman for the event, receiving an additional trophy.

Joanne's sister, Cindy Shank, captured the junior showmanship trophy.

Winners in the various 4-H and FFA steer events are listed as follows by breed.

Ralene Harbold accepted congratulations and prizes from Harry T. Kauffman Wednesday night during the Pennsylvania Dairy Princess Pageant. Ralene received a pewter pitcher for being named Miss Congeniality by her 32 fellow contestants, and a check for \$100 for placing second runner-up in the contest.

Ralene is Miss Congeniality

Lancaster County's own dairy princess, Ralene Harbold, was named Miss Congeniality Wednesday night at the Pennsylvania Dairy Princess Pageant held during the Pennsylvania All American Dairy Show in Harrisburg.

Wearing a red gown and flashing Pennsylvania's cheeriest smile and biggest dimples, the 19-year-old daughter of Mr. and Mrs. Ray Harbold,

Elizabethtown RD3, also came home with the trophy for second runner-up in the contest.

Marcia Gnagey, a senior at Somerset County's Salisbury Elk Lick High School was crowned the state's new Dairy Princess. She is the daughter of Mr. and Mrs. Norman H. Gnagey. First runner-up was Ellen Mae Hersberger, 18, RD1, Martinsburg, Bedford County, daughter of Mr.

Russell Kline, Reinholds, captured top honors in Holstein competition on Monday during the Pennsylvania Junior Dairy

Show. The 18-year-old Ephrata High School graduate also took reserve honors in showman-fitter competition.

Winners Named at Pa. All American

Russell Kline spent a lot of time this past week in the winner's circle, and he was still going strong as this issue of Lancaster Farming was going to press.

On Monday in Harrisburg, the 18-year-old Reinholds youth did a lot to preserve Lancaster County's reputation for outstanding dairy cows by capturing the grand champion ribbon for Holsteins in the Pennsylvania Junior Dairy Show. He followed that feat with a reserve champion showmanship ribbon.

On Thursday night, Kline picked up another first place ribbon when he won grand champion honors at the Ephrata Fair Hog Show. And he had yet to compete in the dairy show.

Chester County was the big winner at the Junior Dairy Show, with two of the seven grand champion ribbons going there.

Kennard Henley, III, just four years older than his eight-year-old cow, "Ardrossan G L R Minerva," took top honors in the

Ayrshire classes. It was the third straight year that Kennard and "Minerva" were the top winning combination in their breed. His older sister, Sharon, 15, showed the junior champion, "Tower-view Kelly's Beth," a junior yearling. Sharon was also reserve grand champion fitter-showman. The Henleys live at RD1, Cochranville.

The other Chester County winner was Catherine Wollaston, 16, Toughkenamon, grand champion with a four-year-old Jersey, "Liberator Maple Lawn Cindy."

The biggest winner on a family basis were three children of Mr. and Mrs. Samuel Yoder, Shoemakersville. Of the six titles available in the Milking Shorthorn classes, the Berks County youngsters won four. Fifteen-year-old Samuel, Jr., won both the grand and reserve grand championships. Respectively, they were "Pinesedge K Rose W

Green Dragon Hay

Friday, September 21

12 loads hay, including: Few loads Alfalfa 49.00 - 60.00; couple loads Timothy 47.00 and 49.00; few loads Mixed hay 43.50 - 67.00. 4 loads straw 37.00 - 53.00. 8 loads corn 62.00 - 74.00; 4 loads 41.50 - 57.50.

Bats Broadcast?

Bats usually broadcast sonar pulses at frequencies too high for humans to hear. The pulses of a Malayan naked free-tailed bat have been measured at 145 decibels, comparable to the sound level of some jets at takeoff.

Local Grain

Thursday, September 27

These prices are made up of the average prices quoted by five participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel except for ear corn which is per ton.

The average local grain prices quoted Thursday, September 27, 1973, are as follows:

	Bid+	Offered+
Ear Corn, Old	60.00	70.00
Ear Corn, New	40.00	48.00
Shelled Corn	2.34	2.61
Oats, Local	1.10	1.32
Oats, Western	1.66	1.79
Barley	1.98	2.28
Wheat	3.99	4.05

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

New York Dressed Meats

Wednesday, September 26
Daily Distributive-Less than Carlot Meat Trade -
Compared with Tuesday: Carcass beef prices crowding low quotation; veal and calf steady; lamb generally weak; listed pork cuts mostly \$2.00 lower except hams steady.

Majority wholesale coolers will be closed in observance of Jewish holidays Thursday and Friday of current week. Meat sellers pushing to accomplish full clearance of rail stocks and happy regarding the short week as dollar return was again on the minus side. Receipts will be small in all divisions for balance of week.

Days, Rainfall Growing Degree

A report from Penn State of weekly crop and weather roundups with a report on weather conditions for the week ending September 24.

In Lancaster, the average temperature for the week was 62 degrees, -2 degrees below the normal average for the time of year, weekly high was 81 degrees, low 43 degrees.

Growing degree days from April 1 for crops that start at 50-degrees totaled 2973 degrees, or 108 more than normal in an average year.

Rainfall for the week totaled .88 inches; rainfall from April 1 totaled 23.03 inches, or -1.11 inches less than normal.

Minerals On Mars

Studies of Mars indicate that the planet's dust consists of minerals that include some 60 percent silicon dioxide, a concentration close to the average for earth's crust

Delmarva

Wednesday, Sept. 26
Broiler-Fryer Market

Ready to cook demand fairly good. Offerings no more than adequate with only an occasional plant not fully booked for the balance of this week. Prices trended higher in most quarters. Live supplies ample and rate of growth is advancing under ideal weather conditions.

Pool trucklot prices for Thursday arrival US Grade A 40-45, mostly 40½-41; Plant Grade 39½-43, mostly 40.

Omaha Cattle

Thursday, September 27

Compared with last week's close: closing prices on slaughter steers 3.00-4.00 lower with maximum decline on yield grade 4-5 1200-1350 pound. Heifers 2.00-3.00 lower. Cows steady after early decline recovered. Bulls - 1.00-2.00 lower. Scattered feeder sales 2.00-3.00 lower with trade poorly tested.

Four day receipts 11,200 as compared 19,900 previous week and 15,600 a year ago. For sixth successive week, prices on slaughter steers and heifers pointed downward as one of the most severe declines in history of cattle industry continued with current prices 14.00-18.00 below August peak. Most of current downturn on opening session when more than 60 percent of four day total counted in and prices at wholesale level plunged downward. Weight and yield grade major price determining factors with yield grade 2-3 Holstein steers often selling well above high-Choice 1300-1350 pound yield grade 4-5. Price differentials in carcass trade ranged up to 15.00 between various weight and yield grade carcasses.

STEERS: Load high-Choice and Prime 1148 pounds Grade 3 40.50, moderate volume 1000-1278 3-4 39.50-40.00. Choice 975-1300 2-4 38.00-39.50, some yield grade 2-3 1000-1050 39.75-40.00, and several loads high-Choice 1325-1350 4-5 34.50-35.00. Mixed Good and Choice 950-1250 37.25-38.25. Good 36.00-37.50, yield grade 2-3 Holsteins 36.00-36.50.

Average cost slaughter steers first three days 38.33 average weight 1117 pounds as compared 44.86 and 1143 pounds previous week and 34.94 and 1123 pounds a year ago.

HEIFERS: Four loads high-Choice and Prime 980-1015 pounds 3-4 39.50-39.75, others same grade 884-1062 38.50-39.00, load 1115 pounds 4-5 36.00. Choice 850-1075 2-4 closed 37.50-39.00. Mixed Good and Choice 800-1000 36.00-37.50 Good 34.50-36.00. Standard and low-Good 33.50-34.50

Egg Market

Wednesday, Sept. 26
Philadelphia Eggs

Prices unchanged. Demand good for mediums, fair to good for large and only fair on smalls. Some feature activity building for next week. Offerings and supplies ample on large and smalls, adequate on mediums.

Prices to retailers: Sales to volume buyers, consumer grades white eggs in cartons, delivered: store door A Extra Large 72-73½, A Large 71-72½, A Medium 64-65½.

Wednesday, Sept. 26
Baltimore Eggs

Prices unchanged to 1 cent lower. Demand fair. Supplies of large ample and mediums adequate. Cartoned eggs: Prices to retailers, state graded (min one case sale) White Grade A Large 75-82, mostly 75-78; Grade A Medium 69-75, mostly 69-71.

Eastern Pa. and N. J.

Wednesday, Sept. 26
Live Poultry

Undertone weak and prices are lower on new bookings. Offerings fully adequate. Much price resistance has developed on further processed items.

Prices paid at farm: Light type hens 18-29, mostly 21-21¼ in Pa., Mostly 21-23 in N. J. Heavy type hens TFEWR.

New Holland Horse Auction

Monday, September 24

Reported receipts of 495 head of horses, mules and ponies; market steady with last weeks market.

Load New York riding horses 175 - 235.

Load Illinois riding horses and driving horses; riding horses 160 - 375; driving horses 195 - 440.

Load Kansas riding horses 140 - 315.

Load North Carolina riding horses 195 - 345.

Local work horses 185 - 400; mules 125 - 170; driving horses 160 - 600; riding horses 135 - 225; better horses 255 - 295.

Killers: Lightweight 8 - 11; heavyweight 15 - 20.

Mare ponies 10 - 30; colts 3 - 8; geldings 10 - 20; larger ponies 40 - 70.

COWS: Utility and Commercial 30.00-32.00, few 32.25-32.50. Canner and Cutter 26.50-30.00, mixed Cutter and low-Utility 30.25-31.00.

BULLS: Yield grade 1-2 1300-2100 pounds 34.00-38.00, few yield grade 1 39.00-40.00 early. Few Good and Choice 1100-1300 bullocks 37.00-39.00.

FEEDERS: Limited sales 2.00-3.00 lower in sympathy with sharp downward trend on slaughter cattle but supply hardly sufficient for good market test. Outshipments 1000 head compared 1600 previous week.

STEERS: Approximately eight loads Choice 599-644 pounds 51.50-52.50. Four loads Choice 966 pounds fleshy steers 39.50, part loads Choice 1010-1063 38.50, most high-Good and Choice 950-1050 fleshy 37.50-38.00.

HEIFERS: Part load Choice 286 pounds 50.00, three loads Choice 510-528 47.00-48.25.

I've Heard Everything Now!

That new house I bought has six rooms and 1 and ¾ bathrooms. That fractional bathroom is really something else. It has a sink, a bowl, a tub — but no pipes! And the furnishings! Wall-to-wall carpeting, air-conditioning and 'ack-to-the-wall payments'!

Congeniality

(Continued From Page 1)

and Mrs. Charles F. Her-shberger.

All of the contestants previously were acclaimed Dairy Princesses in local contests. Two represent two-county areas, a third is from the Penn State Dairy Science Club and the other 30 have county titles. All are daughters of dairy farm families.

Not only was the 33 contestants a record number for a Pennsylvania Dairy Princess contest, seven more than previous high set just last year, but a record number also entered at the local level, 236.

Presiding at the coronation ceremony was the 1972 Dairy Princess Rose M. Winkelbauer, a sophomore at Edinboro State College in her native Erie County.

OCT. 1-7, 1973

Forest rangers shudder, some woods are too dry.

Autumnal migration of birds at its peak now . . . Ford introduced Model "T" Oct. 1, 1908 . . . First quarter of the Moon Oct. 4 . . . Scallop season opens . . . Average length of days for week, 11 hours, 35 minutes . . . California gold rush began Oct. 6, 1848 . . . First World Series Boston-Pittsburgh 1903 . . . Yom Kippur Oct. 6 . . . First cotton prints made in Penn. 1810 . . . A warm heart requires a cool head.

Ask the Old Farmer: While in Maine this summer we noticed that many natives had smoked herring for breakfast two or three times a week. Do many New England coastal residents still like the old-fashioned breakfasts? J. F., Alexandria, Va.

They sure do. And not just up and down the coast. Besides smoked herring, many Yankees like breakfasts of codfish cakes and beans, warmed-over chowder and cornbread, and fried smelts and johnny cakes. A lot of apple pie disappears at breakfast too.

Home Hints: Use wet absorbent cotton to collect small fragments of glass . . . Linseed oil will remove tar from a car . . . Fresh eggs will sink in a bowl of cold water; bad ones will float.

OLD FARMER'S WEATHER FORECASTS

New England: Week begins partly cloudy and mild, then light rain; end of week clear and warm.

Greater New York-New Jersey: Clear all week; temperatures becoming hot as week progresses.

Middle Atlantic Coastal: First part of week mostly clear and warm; cloudy and very warm latter part.

Southeast Coastal-Piedmont: Early week showers along coast; most of week partly cloudy and hot.

Florida: Rain all week and very warm.

Upstate & Western New York-Toronto & Montreal: Week begins partly cloudy and cool, then showers at midweek; end of week cloudy and warmer.

Greater Ohio Valley: Clear all week; temperatures warm at first, becoming hot by weekend.

Deep South: Mostly clear and hot all week.

Chicago and Southern Great Lakes: Cloudy with scattered showers and very warm throughout week.

Northern Great Plains-Great Lakes: Clear and hot through midweek, then partly cloudy; rain latter part.

Central Great Plains: Clear all week; very warm temperatures becoming hot at end of week.

Texas-Oklahoma: Clear skies and hot temperatures throughout week.

Rocky Mountain Region: Mostly clear all week; temperatures cooling off towards end of week.

Southwest Desert: Cloudy and warm at first, then rain; latter part clear with highs in mid-90s.

Pacific Northwest: Cloudy and hot to start, then cooler at midweek; end of week clear and warm.

California: Week begins clear and hot, then overcast and cooler; end of week clear and warm.

Sperry New Holland To Construct Manufacturing Plant In Brazil

Sperry New Holland Division of Sperry Rand Corporation announced this week it has formed a company to manufacture and sell farm equipment in Brazil.

According to Kenneth F. Thompson, Sperry New Holland president, the new company will have two Brazilian partners.

An agreement signed recently by the principals gives Sperry New Holland 73 percent ownership, Thompson said. Agroaviao, Ltd., former New Holland distributor in Brazil, acquires 20 percent interest, he said, and Banco Bamerindus do Brazil, seven percent.

The New Holland company manufactures farm and industrial equipment. It ranks fifth largest of the world's farm equipment manufacturers and is the largest non-tractor manufacturer. Its farm machinery is sold in 80 countries.

Thompson said his company will erect a manufacturing complex on a 200-acre site it recently acquired in the city of Curitiba in the state of Parana. Construction is slated to get under way in October 1973, with completion set for August 1974, he said. Within the first year it is expected that approximately 500 persons will be employed at the plant.

Initial production will involve grain combines, according to Thompson. The first machines will be turned out in October this year. All will be equipped with Brazilian-made engines, wheels, tires and batteries. Factory space is being leased in Curitiba

while the factory is under construction.

Production will be sold to the Brazilian market and for export to other Latin American countries, Thompson explained.

Earlier this year, Brazil's Ministry of Agriculture purchased 50 sets of haymaking equipment from Sperry New Holland for resale to leading livestock farmers in the state of Rio Grande do Sul. Each set included a mower-conditioner, rake and baler.

Curitiba, capital of Parana, has a population of 700,000. It is located in the southern part of Brazil, in the heart of the rich grain and livestock country. Chief products of the area are meat, wheat, rice and soybeans. Brazil is the world's third largest producer of soybeans.

"We plan to begin our Brazilian marketing operations with three branch locations," Thompson said. "One will be in Carazinho, covering the state of Rio Grande do Sul. Another will be in Curitiba, covering the states of Parana, Sao Paulo and Santa Catarina. The third will be located in Goiania, for the states of Matto Grosso, Goias and Minas Gerais.

"We look upon Brazil as largely an untapped market for agricultural development," he continued. "Its farm products will play an increasingly important role in world trade. This is true particularly for grain and meat, which tie in nicely with the products we manufacture. And while our initial production in

Brazil will be limited to grain combines, we see opportunities for increased volume of hay and forage equipment as well."

The Model 1530 combine which the company will produce at its Brazilian location is already a big seller in Europe and other parts of the world. It is not in production domestically, Thompson said.

"The '1530' is particularly well adapted to harvesting rice, a crop also grown widely in Brazil and one of the most difficult crops of all to harvest," Thompson said.

Foreign Soybean Market Urged

A general lackluster market for soy oil throughout Western Europe last year shows U. S. growers need foreign market development activities to boost sales of this soybean product, according to Hilyard Simpkins, Allentown, Mid-Atlantic Soybean Association president.

In the Western European countries, soy oil consumption increased from 1,313 tons to 1,438 tons in 1972. Because of changes in government regulations, Spain and Portugal accounted for the biggest jump in consumption but in at least six countries total use declined last year.

"Soy oil continues to be a profit headache. If U. S. growers want to continue to expand markets, educational and marketing effort on soy oil must increase."

In Spain, a government approved promotion program for vegetable seed oils produced a 60 percent jump in total use of soy oil. The Spanish people now use 12.4 pounds of soy oil per person compared to 7.8 pounds in 1971. Regulations in Portugal now permit soybeans to be identified on oil package labels.

U.S. growers started the first soy oil marketing program for Western Europe earlier this year in Italy. The largest Italian soybean processing company is cooperating in the plan. With the help of U. S. growers, more programs will be developed to boost sales of this soybean product."

U.S. soybean growers conduct this program through the American Soybean Association (ASA) in cooperation with the Italian soybean processor and the USDA Foreign Agricultural Service. ASA directs foreign market development, production research and government relations programs for soybean producers.

Twin Valley FFA Meeting Recaps Summer Activities

The Twin Valley FFA met recently in the vo-ag classroom with Terry Murray, president, conducting the meeting. The regular opening ceremony was used.

The report of the secretary was read and approved. The treasurer's report was given and filed for annual audit, followed by reports given by officers.

Larry Stoltzfus gave a report on the State FFA band in which he participated during FFA Activities Week at Penn State. He encouraged other FFA members to participate. Lloyd Simmers gave a report on the Kutztown Fair in which nine members participated. Robert Stoltzfus gave a report on the Berks County Hog Show and Sale in which he and his brother Melvin participated.

Fred Mast gave a report on the Southeastern District Dairy Show held at the Farm Show Building in which he and Terry Murray participated. These members went to the Pennsylvania Junior Dairy Show in Harrisburg this week.

Terry Murray gave a report on the Wilson Exhibit which was at

Kutztown and Reading Fairs. At Kutztown, the exhibit took fifth place out of a class of 15, and at Reading the exhibit placed third out of a class of eight.

Richard Kurtz gave a brief report on the chicken Bar-B-Q held at Kurtz Fishing Lakes. Terry Murray gave recommendations on the pumpkin contest which will be held October 19 in the High School gym and on the hoagie sale planned for September 29.

Other topics discussed at the meeting were the FFA float for the Halloween Parade and the honey bee projects started by five members.

A game of basketball and refreshments followed the meeting.

TOMORROW

WILL WAKE YOU UP TO THE NEW ERA IN AGRICULTURE

TOMORROW

is the theme of Northeastern '73.

We look for it to be the most spectacular NEPPCO exposition over which the sun has risen in many years.

Here's why. With fluctuating prices . . . uncertain demand . . . consumerism . . . rising costs . . . environmentalists and food fads all coming down hard on the industryman, he wants answers. That's where Northeastern '73 will really shine!

SEMINARS

In-depth presentations to give you tomorrow's short-term and long-term outlook on federal regulations, exports and imports, feed costs, prices . . . plus full review of the world's most successful promotional programs, transportation outlook, inflation, the impact from abroad, and more.

EXHIBITS

It will be like the good old days in central Pennsylvania . . . more exhibits and demonstrations than we've had in many years . . . but with the very latest in agribusiness products and technology.

FAVORITES

Don't forget the Market Egg Show . . . the extensive youth programs . . . the scheduled meetings of sev-

eral industry groups . . . and an all-new display spectacle: the most effective promotional materials in the western world.

ACCOMMODATIONS

Absolutely the best, and most reasonable, we can recall. You will enjoy your stay amid the grandeur of formal gardens, the plush appointments of yesterday and Old World service.

SAVE

on registration, secure a preferred accommodation. Get your reservation in early.

School Milk Consumption To Increase 11 Percent

Assistant Secretary of Agriculture Clayton Yeutter estimated today that a total of more than 5.5 billion half-pints of milk will be served to children at school this year through the Federal-State child nutrition programs.

He predicted an increase of some 11 percent in the amount of milk that will be served to the children who take part in the National School Lunch Program and the Special Breakfast Program.

"These Federal-State child nutrition programs," Assistant Secretary Yeutter said, "provide the means to make milk available at school to all of America's 51 million school children, in the school year now getting under way. If children do not have milk service in the school they attend," he pointed out, "it is because local authorities have not chosen to utilize the programs available to them."

The Assistant Secretary gave this outline of the child nutrition programs in operation in schools as the new school year gets under way:

— More than 43 million children are this year attending schools

which make the National School Lunch Program available to their children. A serving of a half-pint of milk must be included in every one of the lunches that is served under this Program. In addition, each of the breakfasts served under the School Breakfast Program — in operation in some 9,000 schools — must also include a half-pint of milk.

— Another three million children attend schools which provide meal service, including milk, which is not Federally subsidized. These schools are eligible to participate in the National School Lunch Program, but choose not to do so. USDA, the States, and other cooperators are encouraging these schools to participate in the National School Lunch Program.

— Five million children are attending schools which do not as yet make any meal service available to their children. The Special Milk Program is available to all of these schools which do not yet provide a food

service to attending children. Under the Special Milk Program, a reimbursement of three cents a half-pint is paid to participating schools for milk purchased for service to children, and the schools use these subsidy payments to reduce the price at which the milk is sold to the children. Again, USDA, the States, and other cooperators are making every effort to get the National School Lunch Program into these schools, so that complete meal including milk may be served to the children who attend them. But the Special Milk Program will make milk available to the children, until such time as the schools join the National School Lunch Program and make full meal service (including milk) available to the children.

Child nutrition programs are administered cooperatively by the Food and Nutrition Service of the U. S. Department of Agriculture, by State educational agencies, and by local school authorities.

New Label Approval for Poultry Products Proposed

The U. S. Department of Agriculture (USDA) proposed new regulations detailing the step-by-step procedure for granting approval of labels, containers, formulas, and methods of preparing poultry products.

The federal poultry inspection program requires advance approval by USDA for labels, containers, formulas, and preparation methods for poultry products processed under federal inspection. According to officials of USDA's Animal and Plant Health Inspection Service (APHIS), the proposed changes are aimed at speeding up the approval process.

The proposed regulations would allow manufacturers to submit labels for review to either the central APHIS label approval office or the APHIS inspector assigned to their plant. Inspectors would review labels submitted to them and have authority to grant approval for certain necessary changes on previously approved labels.

Other proposed requirements

include processor submission of a sketch for each proposed label to APHIS before printing—so that it can be checked for accuracy and completeness—and processor certification to APHIS that containers comply with Food and Drug Administration regulations. A proposed new record-keeping requirement would increase USDA control over reproduction of the official inspection mark by label and branding device manufacturers

Comments on the proposal should be sent in duplicate by November 30 to the USDA Hearing Clerk, Washington, D. C. 20250. Anyone wishing to present his comments orally should contact the Labels and Packaging Staff, APHIS, USDA, Washington, D. C. 20250, to arrange for presentation of his comments before the deadline. Written comments and records of those presented orally will be available for public review in the hearing clerk's office

Going to Market

Grassroots Opinion

MOVILLE, IOWA, RECORD: "It isn't the people who want something for nothing causing all the trouble . . . it's the ones that have succeeded in getting it."

BLAIR, NEBR., PILOT-TRIBUNE: "What would you guess, if someone asked you to name the single category of goods or services that Americans spend the most on? Food? That would be a popular guess, right now. Or perhaps housing? Well, get ready for a shock. In 1971, we spent a total of \$332.6 billion to purchase food, clothing, housing and automobiles. The same year, we spent \$338.5 billion on local, state and federal government."

ACTON, MASS., LITTLETON INDEPENDENT: "Salvation for this country's economic system and its way of life does not lie in increased federal government expenditure, more programs, and more controls. Instead, it lies in individual initiative and desire to produce. Every effort must be made to stimulate a desire for quality and excellence. Rewards should be for those who perform, rather than for those who shirk. Money should be invested in the free enterprise system, rather than in the sink of government inefficiency and carelessness where it is all too easily washed down the drain. If the voters demanded an end to wasteful government spending, loud and clear, there might still be a chance of bringing about a reversal of the tide of welfarism which threatens to engulf this country. Will they speak out in time?"

A Calendar of Fact and Opinion

"The average taxpayer probably finds it difficult to comprehend the size of the 1974 federal budget," comments CIPSCO News, a Central Illinois Public Service Company publication, "of \$268.7 billion. But broken down to what such spending costs each family in the United States—more than \$3,800, the huge budget is viewed in a more personal perspective. The average American

ALTOONA, PA., MIRROR: "Deficit sharing and guaranteed annual tax increases, that's about what the Democrats and Republicans are both promising us, more or less."

ST. MARYS, MO., WEEKLY REVIEW: "Who is going to sacrifice to ease the gasoline shortage? Are you going to cut down on gas usage, drive a smaller car, walk, ride a bicycle, forego a trip, adjust your poor driving habits, etc.—or is it going to be the guy down the street? But he's thinking the same thing about you . . ."

CROOKSVILLE, OHIO, CROOKSVILLE-ROSEVILLE MESSENGER: "The soaring rise in prices reminds us that inflation is like flirting with a girl . . . By the time you become alarmed, there doesn't seem to be anything you can do about it! . . . The price of beef is so high, for example, that cows are no longer being branded: they're being engraved."

BARNESVILLE, MINN., RECORD-REVIEW: "We have been told that the government is going to put a lot of money into a new rocket and . . . rumor has it that it will be named the 'Civil Servant' . . . you can't fire it . . . it won't work . . . and it'll cost the taxpayers a fortune."

WIBAUX, MONT., PIONEER-GAZETTE: "... if some of the 'dead wood' were roused out of Washington, D.C. and honest, hard-working people were allowed to run our government, maybe . . . freeze (s) wouldn't be necessary."

household's share of the 1974 budget is \$3,811, which is more than 76 percent higher than federal spending per household just 10 years ago. Even the cost of spending all this money keeps going up. Every household would have to cough up \$85 this year just to cover the cost of operating the government, an increase of 130 percent over the 1964 cost of \$37."

NOW IS THE TIME . . .

Max Smith
County Agr. Agent
Telephone 394-6851

To Apply Lime

Fields going into winter grain and then to be seeded down next spring, should be checked for lime before seeding. If Lime is needed, it is best to work the lime into the ground before the seeding this fall. The practice of putting the lime on top of the grain field this winter or next spring is not getting the best use of the lime. Most stands of clover and alfalfa will do best if the soil is close to the 6.5 to 7.0 pH range. Growers are urged to have their soil tested soon and incorporate the lime into the soil this fall. It takes from one to two years for ground limestone to do full value to the soil.

To Manage Dairy Herd Carefully

Good herd management is always important but milk producers that are grazing their cows on final growth of clover or alfalfa must be careful to avoid off-flavored milk. The cows should be allowed to graze the area only after the milking period and be taken from it at least four hours before the next milking. On some farms the clover and alfalfa fields are grazed late into the fall to utilize the maximum amount of forage; this can be done with careful management. The cows should be allowed to graze the legume plants only when the plants are dry and never when covered with frost. Severe cases of bloating may occur when these practices are not followed.

To Rodent Proof Grain Bins and Cribbs

The corn harvest is at hand and it appears to be a good crop. Proper storage is very important and this means protection from both the weather and rodents. Many cribs do not have any protection from rats and mice and if the corn is to be stored for any length of time, they will do considerable damage. The use of concrete, hardware cloth, and metal sheets will prevent the rodents from climbing into the stored corn. A rat poison control program can be used in order to keep down the rat population. All broken floors and open stone or concrete walls should be filled in order to prevent nesting. Every farmer should put on a rat control program in order to protect his stored grains and other products.

To Beware of Frosted Forage Crops

The time is here when we could be getting a killing frost; this makes little difference to most grasses and forage crops; however in the case of sudan grass, sorghum, or the sudan-sorghum hybrids, it could mean the development of prussic acid in the plant and toxicity to animals. Growers with these crops should prevent the fresh eating of the frosted crops until one week has passed; when dry the frosted plants may be consumed without danger. Also, the making of the frosted sorghum into silage and permitting to ferment for at least 30 days is another method of utilizing these crops. Careful management is needed after a killing frost.

EXCHANGING GLORY

Lesson for September 24, 1973

Background Scripture: Romans 1:1 through 2:16
Devotional Reading: Romans 1:1-12

A man who worked at the exchange desk of a large department store once told me, "You wouldn't believe some of the people who come to me!" Although there are many legitimate exchanges, he said, many times people want to exchange merchandise simply because they find it difficult to be satisfied with what they have.

Rev. Althouse

I do not find that difficult to believe for I have observed many times that one of our most pervasive human personality traits is our constant dissatisfaction with what we have. The old proverb, of course, is that "The grass is always greener on the other side of the fence." Who has not chuckled at the ridiculous sight of a cow, her head through fence staves, chewing earnestly at grass just outside her pasture and ignoring the equally appealing grass upon which she is standing?

The truth for a lie

Of course, the reason we chuckle at dumb animals is frequently in that we know that people often behave in much the same way. People often seem to have the same difficulty in seeing what is valuable in their own midst. As

Paul put it to the Christians at Rome, "... they exchanged the truth about God for a lie" (1:25).

For some strange reason, the truth is often less attractive to us than a lie or an error. Most people believe lies because they have a desire to believe easy lies rather than hard truths. If the truth is challenging, if it requires something of us, we will tend to embrace a lie that asks nothing of us. Very often, then, people will exchange the truth about God for a lie because the lie is more comfortable in the short run. We give up eternal truth, exchanging it for untruths and half-truths because of the lure of temporary gain or benefit.

A poor exchange

Thus, what may seem a good deal now may very well turn out to be a poor exchange, the worst of deals. Is it in one of Aesop's fables that a dog with a bone in his mouth stares fascinated at his reflection in the water. Thinking his reflection to be another dog with a bigger bone, he opens his mouth to growl and claim the prize below. In doing so, of course, he loses the bone he has and gets nothing but the shattering of an illusion.

So it is with men. Paul says it simply, but eloquently. "Claiming to be wise, they became fools, and exchanged the glory of the immortal God for images resembling mortal man" (1:23).

Of course, technically speaking, we no longer worship idols, god-like figurines. But idolatry goes beyond that and means accepting something less than God as a substitute for him. Thus defined, idolatry is still with us! How often we pass up the Creator for a creature or a created thing, exchanging it and letting go the glory of God.

Owen J. Roberts Chapter Selects Committee Chairmen

An executive meeting of the Owen J. Roberts FFA Chapter was called to order last week by Steve Ussler, president. There were 27 members present.

The secretary read the minutes of the previous meeting. They were approved as read. The treasurers report was read; the report was filed for audit.

President Ussler stated that members should be prompt in paying their State and National dues at \$2.50. Shane Clark moved that those members who had not paid dues by the first Fun Night could not attend. Motion was seconded by Tom Mower; motion carried.

Clark moved that the Chester County dues of 25 cents be paid

for all the Chapter members out of the treasury. Mower seconded, motion carried.

Mower moved that committee chairmen be chosen. Clark seconded; motion carried. Ussler read the list of prospective committee chairmen. Lora Hilbert moved that those members be accepted. Clark seconded; motion carried. Members selected for committee chairmen were as follows:

Ruth Friedhofer, budget; Lisa Bremen, public relations; George Tkaczuk, supervised farming; Steve Ussler, program; Shane Clark, seed sales; Dave Pepple, scholarship and leadership; Grant Hunsberger, recreation; Shane Clark, BOAC; Lora Hilbert, exhibit; Darrel Stoltzfus, bulb sales.

Ussler announced that all orders for FFA jackets should be given to the Chapter secretary.

Advisor Burtner asked Ruth Friedhofer, Chester County secretary, to report on the County meeting of the previous evening. She reported that County dues had been set at 25 cents per member and proceeded to talk about plans for the area's Leadership Training School, which will be held at Camp Inabab, Spring City RD, October 11. The theme is to be "I'm O.K., You're O.K.--What's the Problem?"

Three State officers will be attending the Leadership School. They are: Gerald Metzler, State treasurer; Nevin Mast, State sentinel, and Howard Stoltzfus, Eastern Regional vice-president. They will also lead discussions concerning developing leadership ability with separate groups of Chapter officers.

The Owen J. Roberts Chapter will be responsible for a 15-minute presentation on Public Relations at the Leadership School. The reservation fee will

Pennsylvania Jr. Dairy Show

Dennis Yoder, Christiana RD1, showed the champion senior calf in FFA Holstein competition Monday at the Pennsylvania Dairy show in Harrisburg.

Reserve junior champion honors in Ayrshire competition went to Russell Wilson,

from Masonic Homes, Elizabethtown.

Denise Andrien, nearest camera in photo at left, showed the junior yearling Jersey that went on to capture junior champion honors in breed competition. Denise is from West Chester. Kennard Henley, III, from Cochranville RD1, proudly displays his grand champion Ayrshire in right photo.

John Frey, 401 Beaver Valley Pike, Lancaster, had the top Holstein in the three to four year old class. The second place animal was shown by York Countian Cindy Knight, Airville.

Winners Named at Pa. All American

(Continued From Page 1)

4th," a four-year-old and Pinesedge M.E. Cherry 9th," a two-year-old.

His 12-year-old brother, Frederick, was awarded the reserve junior champion ribbon with his junior calf, "Pinesedge Caesar's Coed" and 11-year-old Wendy was declared the reserve champion fitter-showman.

An innovation on this year's program was a grand champion fitter-showman. The winner is selected from champion fitter-showmen of each breed. Basis for judging is the preparation of the cow for the judging ring and then the excellence of the handling while in the show ring. The grand champion was Jeanine Robinson, 19, McDonald, Washington

County. Miss Robinson also showed the reserve grand champion Jersey. "Fadas Fanfare Sleeper Lou," a two-year-old.

Other winners were:

AYRSHIRE -- Bruce Maulfair, 19, Jonestown, Lebanon County, reserve grand champion; Russell Wilson, 13, Elizabethtown, Lancaster County, reserve junior champion; and Laurretta Kemerer, 19, Latrobe, Westmoreland County, champion fitter-showman.

BROWN SWISS -- Thomas Irons, 18, Smethport, McKean County, grand champion; Dean Daubert, 16, Pine Grove, Schuylkill County, reserve grand champion; Donald Houser, 12, Templeton, Armstrong County, junior champion; Wasy Onulack, 15, Coopersburg, Bucks County, reserve junior champion; Judith Irons, 16, Smethport, champion fitter-showman; and Theresa Irons, 17, Smethport, reserve champion fitter-showman.

GUERNSEY -- Alisa Fava, 12, Scenery Hill, Washington County, grand champion; James Harding, 12, Brookville, Jefferson County, reserve grand champion; John Marchezak, 18, Bentleyville, Washington County, junior champion; David Motto, 15, New Enterprise, Bedford County, reserve junior champion; Kevin Callihan, 15, Imber, Bedford County, champion fitter-showman; Angela Murren, 10, Hanover, Adams County, reserve champion fitter-showman.

JERSEY -- Denise Andrien, 13, West Chester, Chester County, junior champion; Leon Sollenberger, 12, Everett, Bedford County, reserve junior champion; and Debra Cassel, 14, Hummelstown, Dauphin County, reserve champion fitter-showman.

HOLSTEIN (4-H) -- Robert Morrell, 16, Cochranville, Crawford County, grand champion (also junior champion in FFA classes); Candice

Barker, 13, Ulysses, Potter County, reserve grand champion; Carolyn Meyers, Greencastle, Franklin County, junior champion; Douglas Seidel, 19, Richland, Berks County, reserve junior champion; and Joan Blacks, 19, champion fitter-showman.

HOLSTEIN (FFA) -- Donald Reist, 17, Lebanon, Lebanon

County, reserve grand champion; and Brad Shively, Millmont, Union County, reserve junior champion.

MILKING SHORTHORN -- Lance Gilbert, 10, Newville, Cumberland County, junior champion; and Debbie Miller, 14, Saegertown, Crawford County, champion fitter-showman.

New Idea's Superpickers

Low cost way to harvest your corn

Without question, this Avco New Idea Superpicker is the most popular 1-row picker on the market. In true Superpicker tradition, it has big capacity and operates non-stop in all kinds of corn.

The big, hungry gathering unit picks clean in heaviest yields, even in down and tangled corn.

Exclusive Flexi-Finger presser wheels align ears on the husking rolls, keep them moving, so husking efficiency matches the picker's non-stop gathering capacity.

ED ESHLEMAN'S WASHINGTON REPORT

Watergate has made it fashionable to talk about morality in government during the past six months. In fact, since Watergate, some talk as if morality in government and politics is a new topic never before raised as a public issue in this country.

There was a poll released recently that showed parents to be very reluctant to have their children get involved in politics. Those results were said to be an outgrowth of the Watergate publicity. But political morality is not a new issue. It's something that has been with us for many years.

Perhaps a personal illustration will help to put the subject into its proper perspective. During the 12 years I served in the State Legislature - which was six to 18 years prior to any mention of Watergate - I visited our high schools talking to about 100 senior government classes. In everyone of those classes I asked the same question - "How many of you think politics is dirty?" In every one of those classes at least two-thirds of the students raised their hands to indicate that they thought politics was a dirty business.

That would launch me into a "sermonette" to the effect that they weren't born with that attitude. Obviously, these students had acquired their opinion from adults--parents, teachers and others--meaning that society, in general, regarded politics and politicians as morally suspicious.

Then, I would try to distinguish between the statements "politics is dirty" and "there are dirty politicians." There is no doubt that both major parties have had dirty politicians, and I would concede to the students that maybe even the percentage of corrupt people is higher in politics than in other professions because politicians are subjected to greater temptations.

But, the fact remains that it is not politics alone that has people go bad. There are "foul balls" in every job and profession in this country. And the significant thing is that we don't condemn everyone else in those jobs and professions when one of their number goes astray.

When a banker turns "sour," the public doesn't lose faith in its whole banking system - nor should it. If a doctor somewhere is sued for malpractice, people don't immediately lose faith in

Rail Shortages at Grain Elevators to be Monitored

Secretary of Agriculture Earl L. Butz said the U.S. Department of Agriculture (USDA) is setting up a monitoring system to identify areas with critical needs for rail equipment to move grain.

Troublespots will be reported to the Interstate Commerce Commission (ICC), the U.S. Department of Transportation (DOT), and the Association of American Railroads.

Currently, nationwide information to determine areas of greatest need for rail cars is not available. As a result, an elevator with grain on the ground and more being delivered may not be receiving any cars while other elevators with less acute shipping problems are receiving cars. Given this data, government agencies and the Association of American Railroads can take steps that result in a more equitable distribution of cars among all grain shippers.

During the past year grain shippers have experienced a continuing shortage of rail equipment needed to move their commodities. This shortage is

their own family doctor -- nor should they.

The same kind of treatment should be accorded to those in government and politics. Just because some turn "sour" does not mean that the whole democratic system should be condemned. Condemn those who have dishonored a public trust, but don't lose faith in our governmental process.

It is important for all of us to distinguish the difference between saying all of politics is dirty and admitting there are some dirty politicians. There have been and will be politicians turn bad in both parties. But, public confidence in the democratic process must not be undermined. No matter how dirty the politician, it is that individual and not the system that's at fault. Politics is not dirty.

expected to continue during the period of heavy grain movement.

This month nearly all country grain elevator operators will receive a letter and a questionnaire from USDA's Agricultural Marketing Service (AMS) asking them to supply data on the amount of grain presently awaiting rail shipment; grain on hand in the elevator and on the ground, if any; and anticipated receipts and shipments within the next two weeks. Reports by the

warehousemen are voluntary and to be submitted on a weekly basis only when car shortage problems exist. Data collected by the monitoring system will indicate areas and railroads with greatest need for additional equipment.

The information will be compiled by the Transportation and Warehouse Division of AMS. Problem areas will be categorized by state, by USDA crop reporting district, and by railroad. Summaries of the data will go to organizations with direct responsibility over rail equipment supply, including ICC, DOT, and the Association of American Railroads.

Egg Producers

A Scientific Feeding Program that Makes Sense!

A layer needs a specific amount of protein to economically produce eggs to the limit of her genetic ability. It's possible to waste protein both through over feeding as well as under feeding!

Research shows that weather conditions greatly influence a layer's nutritional requirements. When cold weather causes birds to eat more total feed, protein content is reduced. Conversely, hot weather normally reduces intake, so Wayne increases the protein level.

It's a program that makes a lot of sense. See us today for the feed that keeps production UP and feed costs DOWN.

Butz Establishes Panel On Nitrates, Nitrosamines

Secretary of Agriculture Earl L. Butz announced he is establishing an expert panel to advise the U. S. Department of Agriculture (USDA) regarding the safety of the continued use of nitrites in human food and the possible formation of nitrosamines.

"Events in recent months have brought increasing concern about the safety of the use of nitrite as a curing agent," Secretary Butz said. "We have had numerous joint meetings with members of the Food and Drug Administration and other scientists and technologists since 1970. Now, there is a great deal of information in our hands. This panel will study the material and make recommendations as to what action needs to be taken," he said.

Nitrite, a chemical substance used in the curing of meats such as ham, bacon and sausage, has been demonstrated to inhibit the growth of the organism that causes botulism. It has been reported, though, that nitrite can combine with secondary amines in food to form substances called nitrosamines.

"USDA will act promptly on the recommendations of the panel," Secretary Butz said. "Public safety is our main concern."

The six-member panel will be comprised of experts in food science. Panel members are: Dr. Cecile H. Edwards, nutritionist and chairman, department of home economics, Howard University, Washington, D. C.; Dr. Leo Friedman, toxicologist and director, Division of Toxicology, Bureau of Foods, Food and Drug Administration, Washington, D. C.; Dr. Richard A. Greenberg, microbiologist and director of research, Swift and Co., Oak Brook, Ill.; Dr. James P. Keating, pediatrician, St. Louis Children's Hospital, St. Louis, Mo.; Dr. Aaron E. Wasserman, research chemist, Agricultural Research Service, U. S. Department of Agriculture, Philadelphia, and Dr. John H. Weisburger, pathologist and vice-president for research, American Health Foundation, New York, N. Y.

Official notice of establishment of the panel was published in the Sept. 20 Federal Register.

Airsacculitis Condemnation To be Clarified

The U. S. Department of Agriculture (USDA) proposed to clarify present criteria for condemning poultry affected with airsacculitis.

USDA's Animal and Plant Health Inspection Service (APHIS) said the proposal would add a paragraph to the Poultry Products Inspection regulations which would identify airsacculitis as a condition requiring condemnation of the entire carcass or the affected parts. The disease usually affects the lower part of the respiratory tract.

APHIS officials explained that although condemnations attributed to airsacculitis occur, the regulations do not specifically mention the condition by name. The proposal would establish a new heading under the post mortem inspection section of the regulations, entitled "Airsacculitis." Identifying the condition in the regulations under the Act will help achieve uniform application of inspection standards.

A notice concerning the proposal appeared in the Federal Register. Any person wishing to submit comments concerning the proposal may do so by filing them in duplicate with the Hearing Clerk, U. S. Department of Agriculture, Washington, D. C. 20250, by Nov. 30.

Any person desiring to be heard orally, should address his request to the Inspection Standards and Regulations Staff, Meat and Poultry Inspection Program, APHIS, USDA, Washington, D.C. 20250. Transcripts of oral hearings and written comments will be available for public inspection.

PUT YOURSELF INTO THE FUTURE! LET THE SUNSHINE IN WITH... SOLAIR SYSTEMS

SOLAIR COW BAY WITH THE "SUN SENSOR"

FEATURES THE FOLLOWING:

1. Storm-and fire-resistant construction.
2. Rapid evaporation and dehumidification through "solar thermo" circulation.
3. Engineered for expansion
4. Designed for either beef or dairy cattle
5. Straight line scrape areas.
6. "Quick dry" floor areas.
7. North side ventilation—summer only.
8. Three sided wall structure—open South
9. "Jalousie type" Southern roof provides direct sun rays on 80 per cent of floor — OPTIONAL.
10. "Sun Sensor" control automatically opens and closes optional jalousie roof for maximum winter comfort
11. Complete herd grouping accommodations
12. Automated feed control.

WE'RE INTERESTED IN ECOLOGY!

With our completely covered lots and a sun roof with an open peak, rain water does not enter the bay area and maximum evaporation of animal liquids is obtained. An "all-drained" floor system is installed and a curbed fence line keeps manure in place to be scraped into a liquid pit or a push-off loading system. By preventing manure run-off the surrounding area is not polluted.

Yes, since your urban neighbors and government fathers are interested in ecology, we are ready to help you build a system that will put you ahead on the pollution problem.

And, low moisture levels in Solair Systems results in less bacteria action and fewer odors

Champion showmanship honors in the Ephrata Fair Baby Beef Show went to Mike

Martin, New Holland.

Lancaster Farming Photos

Lancaster County's newest Poultry Queen, Rhoda Stauffer, greeted spectators at Wednesday night's parade held during the Ephrata Community Fair. Rhoda is the daughter of Mr. and Mrs. Clarence Stauffer, Ephrata.

Fairs At Ephrata, Lampeter

Ronald Zimmerman captured grand champion honors in Thursday night's baby beef competition at the Ephrata Fair. He's shown with his Angus steer accepting a trophy from Mrs. Carol Weaver, wife of the beef show's general chairman.

Junior market lamb competition at this week's Ephrata Fair was dominated by the Herr Family. Barbara Herr, left, took grand champion honors with her Dorset, Elizabeth had the reserve grand, a Suffolk, and Christian showed the top on-foot animal in the carcass lamb contest. All are children of Dr. and Mrs. Robert Herr, Narvon RD2.

Russell Kline took his accustomed place in the winner's circle when he accepted the grand champion trophy in the Ephrata Fair Hog Show on Thursday.

At Ephrata,

(Continued From Page 1)

FFA

Angus - Jeff Cramer, Strasburg RD1, first; Rick Hess, Strasburg RD1, second; Galen Long, Columbia RD2, third; and Curt Hess, Strasburg RD1, fourth.

Crossbred - Dwight Houser, Lampeter, first; Bob Shenk, Washington Boro RD1, second.

4-H

Angus - Carol Harnish, Lancaster RD6, first; Greg Greider, Columbia RD2, second; Cathy Harnish, Lancaster RD6, third; Rick Hess, Strasburg RD1, fourth.

Hereford - Joanne Shank, Conestoga RD1, first; Marcie Shank, Conestoga RD1, second; Ed Hess, Strasburg RD1, third; and Gary Forry, Horseshoe Road, fourth.

Crossbred - Tim Hess, Lancaster RD2, first; Robert Hess, Lancaster RD2, second; Debra Greider, Columbia RD2, third; Gary Brubaker, Running Pump Road, fourth.

In Wednesday afternoon's swine competition, Rick Pfautz, 18, Stevens RD1, captured both the champion boar and champion sow awards.

A 1972 graduate of Ephrata Area High School, Rick is the son of Mr. and Mrs. Leroy Pfautz.

The champion market hog was shown by Carl Thomas, 14, son of Mr. and Mrs. John Thomas, Millersville RD1. In addition, Carl showed the champion pen of four hogs.

The hog show was judged by Mark Nestleroth, Manheim.

At the sheep show on Wednesday, blue ribbons were rather evenly distributed between about six exhibitors showing 52 sheep in seven breeds.

Among those exhibiting sheep were Tim, Edward and LaRue Donough, Manheim RD4 and RD2; Randy Walker, Lancaster RD6; Clyde Brubaker, Harrisburg Pike; Harold Harp-

ster and family, Boalsburg; Lynn Cartey, Centre Hall; and Calvert Farms, Spraggs.

In Dairy Show competition on Thursday, Susan Frey showed an aged cow to the grand champion Holstein honors. The cow was owned by Susan's father, J. Mowery Frey.

Frey's five-year-old cow was also among the best three females in the show.

James High's five-year-old Holstein took the reserve champion ribbon.

The 4-H champion entry was won by Sandra Frey, daughter of J. Mowery Frey. The reserve honors went to Randy Hess.

Rick Hess, son of Mr. and Mrs. Richard Hess, took the top FFA honors.

Rick's cousin, Randy Hess captured the senior showman trophy while Randy's cousin, Jack Hess, took the junior showman award.

Keeping it in the family, Elvin Hess, Randy's father, captured the senior Holstein get award. Jay Landis's Holstein took the best udder award.

Another Hess, Curt, also took the junior reserve ribbon while Susan Frey took the Holstein Junior championship.

The grand champion for the Guernsey event went to Kenneth Garber, Willow Street RD2. Garber's entry also took the senior champion Guernsey title.

Garber's son, Gerald, captured the junior champion Guernsey title with his eight-month-old junior calf.

Arthur Brenneman won the reserve grand champion title with his Guernsey and also the senior reserve ribbon. Brenneman also showed the best three Guernsey females. Ken Garber captured the best udder award in the Guernsey competition.

In the Brown Swiss breed, Steve Witowski's junior calf took top honors. It was the only entry.

The show was judged by Sam Acker, Chester Springs.

Kerry Boyd, Ephrata, showed the reserve grand champion at the Ephrata Fair Baby

Beef Show on Thursday night.

Ephrata Winners

Competition at the Ephrata Fair began Tuesday night with a greased pig chase and an adult tractor driving contest.

The tractor drivers were faced with an unusual test of skill this time, with the addition of a double hitch backing contest to the regular tractor course. The contest consisted of backing a tractor towing a forage harvester and forage wagon -- all 10 axles -- down a marked course without "jack-knifing" or crossing the marked lines.

Charles Ackley, a vo-ag instructor at Ephrata Area High School for the past nine years, won the event. One of the courses he teaches is tractor safety.

First place winner in the regular tractor driving contest Tuesday was Leonard Kreider, Lititz RD4.

Kreider demonstrated his tractor driving skill by driving a manure spreader through an

obstacle course, backing it into a stall and backing a four-wheel wagon into a stall.

Second place in the tractor driving competition went to Clark Stauffer, Ephrata RD1. Tom Zartman, Ephrata RD1, placed third and Glenn Martin, Ephrata RD1, placed fourth.

In the pig chase, 14-year-old Daryl Martin proved to be the best bacon bagger in the 15-years and under competition. He is the son of Mr. and Mrs. Theodore H. Martin, Ephrata RD1. Martin's prize was his catch.

The two runnersup in the event, Steve Nelson 15-year-old son of Mr. and Mrs. Richard Nelson, Stevens RD2, and Dennis Martin, 14-year-old son of Mr. and Mrs. Theodore H. Martin, Ephrata RD1, each won 10 pounds of pork chops.

In over 15 years of age competition, Dave Moore, 32, Ephrata RD2, won the 150-pound pig which he captured.

Other finalists in the adult pig chase were Phil Leininger, 20, Denver RD2, Edwin Williams, 41, Stevens RD1; and Dale Weidman, 23, Stevens RD1.

In Wednesday's junior market lamb show, the three children of Dr. and Mrs. Robert D. Herr, Narvon RD2, had the champion and reserve champion market lambs and the champion on-foot carcass lamb.

Dr. Herr is chairman of the vocational agriculture department at Garden Spot High School, in addition to being one of the county's top sheep farmers. The Herrs raise about 90 sheep. Ten-year-old Barbara took the grand champion market lamb rosette with her Dorset lamb. The reserve grand champion market lamb was shown by 14-year-old Elizabeth. Her entry was the champion Suffolk lamb.

The top on-foot carcass lamb

Community Night Observed by Fulton Grange

Fulton Grange 66 observed Community Night at the Grange Hall in Oakryn September 24 by holding a covered dish supper. A bountiful repast was enjoyed by the Grangers and guests.

Following the meal Miss Diane Risk, daughter of Mr. and Mrs. Paul Risk, Quarryville RD2, showed colored slides and told about her five week visit in Brazil last July and August on the Lions Club student exchange program. She explained the cultural, geographical, social and economic background of the country and the home life of the people there. She also displayed some souvenirs she brought home with her.

The Lecturer, Mrs. J. Stanley Stauffer Jr., passed around the centennial guessing box. The contents, 100 tea bags, was guessed by Mrs. Paul Risk and she received the box.

The Master, Richard Holloway,

conducted the business session. The Grange went on record in favor of building the proposed new Pennsylvania Farm Show Building in Harrisburg.

The Youth committee chairman, Clifford Holloway III, announced that the Grange float in the Southern Lancaster County Community Fair parade September 21 won first place in the best appearing farm group category. It depicted the 100th anniversary of Fulton Grange which will occur January 4, 1974. The youth committee will sponsor a hayride October 6, leaving the farm of Clifford Holloway Jr., near Wakefield, at 8 p.m. and refreshments will be served upon their return.

The Women's Activities committee of Fulton Grange will have a food stand at the Owen Groff sale October 6 and the Pomona Women's Activities committee will have a food stand

at the Robert Armstrong sale October 20.

Girl Scout Troop 905 and Brownie Troop 1130 will be meeting at the Grange Hall Tuesdays at 7:30 p.m.

Lancaster County Pomona Grange will meet at the White Horse Fire Hall October 20 at 8 p.m. as guests of Salisbury Grange.

The Pennsylvania State Grange will meet in Reading October 22 - 25. A centennial banquet is scheduled for October 23, fifth and sixth degrees will be conferred October 24 and a centennial pageant will be presented October 25. Many Lancaster County Grangers will be attending the session.

An installing team from Fulton Grange will install the officers of four Harford County, Maryland, Granges October 3 at 8 p.m. at the Dublin Grange Hall.

The newly elected Grange officers will be installed at the next meeting of Fulton Grange October 8.

Mrs. Charles McSparran

GOOD CALF GROWTH PAYS OFF

WHEN HEIFERS START MILKING

Good solid calf growth can be put on fast at low cost. And it can pay off in early freshening and good production right from the first lactation.

Many dairy men have proved to themselves that the Purina Calf Growing Program can help develop heifers that freshen between 22 and 24 months and repay their growing costs in the early months of lactation.

Here's the Purina Calf Growing Program:

First 3 days—Colostrum

4 days thru 4 or 5 weeks—Purina Nursing Chow®—a milk-base milk replacer fortified with vitamins and minerals.

4 days thru 2 months—Purina Calf Startena®—a palatable calf ration with a research-proved energy-protein balance for good calf growth.

3 thru 6 months—Purina Calf Growena®—a 16% ration that provides a high palatable level of protein that fast growth demands. Calf Growena is fortified with vitamins and minerals.

At end of 2 months—Good quality hay free-choice.

Prove to yourself that it can pay to grow calves on the Purina program. Stop in and talk to us—at the sign of the familiar red and white Checkerboard.

Strasburg Invitational Golf Tournament Held

Co-sponsors of the Strasburg Sixth Annual Invitational Golf Tournament held at Host Farms congratulate John Emich, winner of the Low Net Grand Prize. Left to right are: Wilbur Garman, manager of

Strasburg Bank's Willow Street office; Richard Spence, owner of Spence Mobile Homes; John Emich; and Joseph Devine, owner of Devine's Cafe.

The First National Bank of Strasburg joined Devine's Cafe, Strasburg, and Spence Mobile Homes, Ronks RD1, to sponsor the Sixth Annual Strasburg Invitational Golf Tournament held recently at Host Farms in Lancaster. Wilbur Garman, manager of the bank's Willow Street office; Joseph Devine, owner of Devine's; and Richard Spence owner of the mobile

home firm, served as chairmen for the tournament.

Over 125 local businessmen and guests participated in the 18-hole match. A dinner at the Strasburg Sportsmen's Lodge was held after the tournament. The winner of the golfing contest was John Emich, of Binkley & Ober, Inc., East Petersburg. Emich had a final score of 72 which won the Low Net Prize.

July 1977 Runoff Control Deadline

Feedlot effluent limitations guidelines proposed by the Environmental Protection Agency (EPA) will affect most segments of the concentrated livestock and poultry production industries in the nation, according to the U.S. Department of Agriculture.

As differentiated from pasture or rangeland conditions, the proposed EPA regulations state that "... 'feedlot' shall mean a concentrated, confined animal or poultry growing operation for meat, milk, or egg production, or stabling, in pens or houses wherein the animals or poultry are fed at the place of confinement and crop production is not sustained in the area of confinement."

In issuing the proposed effluent limitations, EPA pointed out that "water pollution from the feedlot industry is almost wholly predicated upon the occurrence of a rainfall event which causes surface runoff of manure. The other potential source is from discharges due either to the wash-down or flushing of wastes from pens, barns or other feedlot facilities or overflows from continuous flow watering systems. Since the effect of rainfall runoff is generally much greater than these other sources of discharge, it is the control of runoff thereof which must provide the baseline for effluent limitations."

The EPA proposal was published in the Federal Register of Sept. 7, 1973.

The proposed limitations are tied to two dates.

By July 1, 1977, all beef cattle, swine, dairy, sheep, and poultry "feedlot" operations (except ducks) will be required to have in use the "best practicable control technology available" to control runoff.

The 1977 proposed standards are based upon the "feedlot" operator having storage capacity for each operation which will contain waste water plus the

runoff occurring from the highest 24-hour storm event reported likely to occur in a 10-year period based upon U. S. Weather Bureau records for the local region.

By July 1, 1983, all "feedlot" operations (including ducks) will be required to have in use the "best available technology economically achievable" to assure discharge of pollutants from feeding operations.

The 1983 proposed standards are based upon a storage capacity for the "feedlot" operations which will contain waste water plus the runoff from a 24-hour storm event likely to occur in a 25-year period.

In addition, new facilities constructed after these regulations go into effect will be required to have in use pollution control facilities to meet the 1983 standards.

All "feedlot" operations will be expected to comply with these standards. Under the provisions of the National Pollution Discharge Elimination System (NPDES), large operators will feel the effects of the guidelines sooner because they are required to register and obtain permits which are based on the guidelines. This proposal was published in the Federal Register of May 3, 1973.

All persons interested in submitting written comments on EPA's proposed "feedlot" regulations must do so not later than October 9, 1973. Comments should be submitted in triplicate to the EPA Information Center, Environmental Protection Agency, Washington, D. C. 20460.

From Local Ag Teachers:

Thoughts in Passing

The article for this week was prepared by Donald M. Robinson, Adult Farmer advisor at Garden Spot High School.

Developing A Feeding Plan

Recently Dr. Richard Adams, dairy specialist and head of the Penn state forage testing laboratory, spoke to the Garden Spot Young Farmers on developing a feeding plan for your livestock, and his comments are worth summarizing.

With higher-than-ever feed prices we cannot be bound to tradition to feeding the same feed we have been used to if it is not the most economical source of production and gain. In the ever challenging race to increase production we sometimes do it at the expense of profit. It is possible that the ration that gives the highest production may not always be the most profitable.

Developing a feeding plan involves three basic steps. First, the nutritional needs of the livestock must be determined based on age, size, and production level. In determining needs, be complete — not just energy and protein, but minerals and fiber as well.

Secondly, after nutritional needs have been calculated, all forages fed should be analyzed for energy, protein, fiber, and minerals. Forage intake must also be carefully measured. Many production difficulties come from feeding inadequate

amounts of forage or a low quality forage.

And third, once needs have been determined and forages analyzed to see how much of these needs are being met by the forages, the nutrients still needed must then be made up with supplemental feeds. It is at this point that much attention to cost must be given and the use of alternative sources of protein and energy considered. Use of non-protein nitrogen such as urea, anhydrous ammonia, urea-molasses mixes, use of cheaper grains or grain by-products, or dealer pre-mixes can be the answer for lower feed costs if carefully considered. But great care must be exercised to be sure the resulting feeds meet your livestock's needs and are not being fed at toxic levels. This is where a competent feed dealer, Extension service personnel or a vo-ag instructor can be of great assistance to you.

Probably the cheapest way to cut feed costs is to produce and feed quality roughages, especially hay. Another consideration while thinking about roughages is the relative amounts of each forage being fed. For dairy, all corn silage or all hay rations can lead to serious production and health problems in the herd in spite of apparent initial success in the early stages of such a feeding program. This is particularly true with dry cows. Large mineral imbalances can occur that will have far reaching effects.

I might add these thoughts to those brought out by Dr. Adams: The forage analysis is just

another tool that farm managers have to use as the business of agriculture becomes more sophisticated. But, do not be deceived, at best the analysis and resulting feeding plan are merely guides or starting points — and recommendations must be carried out and tempered with experience and a watchful eye to the livestock response in production and health.

Health Care Pamphlets Being Distributed

To Rural Residents

The Pennsylvania Department of Agriculture is cooperating with the National Foundation - March of Dimes in distributing literature to rural residents on health and baby care, it was announced by Agriculture Secretary Jim McHale.

The Secretary said that regional personnel in the department's Bureau of Rural Affairs are contacting farmers and residents in remote rural areas to give them educational pamphlets and health charts prepared by the March of Dimes.

"Many of these people haven't been to a doctor in years," said McHale. "The March of Dimes in an effort to prevent birth defects

has prepared some excellent literature on pre-natal care and on keeping family health records."

McHale said the literature encourages expectant mothers to visit available clinics or doctors, instructing them on what family health records to prepare for their visits.

One pamphlet details the diet an expectant mother should follow, and lists complications which would prompt immediate medical attention.

"We have to realize," said McHale, "that many rural residents have never heard of blood types or bladder infections and so forth. The information capsulized by the March of Dimes should prove invaluable."

McHale said the distribution is being handled by the rural coordinators located in the department's seven regional offices.

Land-to-Land Sewage - Way To Meet Fertilizer Shortage?

With a fertilizer shortage threatening farm production next year, it is time to take seriously proposals for using municipal sewage on our farmlands.

Using sewage to increase crop yields has been practiced for centuries in different parts of the world. And today, with our crowded cities facing the need to build more and more expensive sewage disposal facilities, we become more tempted to revert to old time solutions.

Currently, most American farmers depend on commercial fertilizers. But devaluation of the

dollar and a real or contrived fuel shortage has cut down on our fertilizer supply.

Sen. Hubert Humphrey (D-Minn.) talked about the heavy exports of fertilizers recently. He remarked that devaluation of the dollar has made American products a good buy for foreign countries. The problem, he said, is that fertilizer has been leaving the country at too fast a rate and, as a result, he predicted a shortage of 20 million tons of grains in next year's crops.

Commercial fertilizer production also suffered from

this year's fuel shortages. These nitrogen compounds require heat for production.

The dwindling supply, of course, has meant increasing prices for fertilizer. So farmers are caught in the double evil of short supply and high production expenses.

One of the benefits of "sewage farming" is that more low cost fertilizer is available. In Pennsylvania, there have been reports of a number of farmers who have taken the initiative and contracted with municipalities to haul sludge to their fields.

Another benefit proven on Pennsylvania State University test plots is that fields irrigated with sewage effluent produced yields up to twice as great as the conventional plot dependent on rainfall for moisture.

A third benefit accrues to the city dweller whose taxes constantly rise to support sophisticated multi-billion dollar sewage disposal plants.

Wisconsin state Sen. Douglas LaFollette, recently presented the case of land-to-land sewage very well.

"As a conservationist and a state senator," he said, "I want to suggest a new method of sewage treatment which curbs pollution and gives the farmer an important role in solving this problem of America's urban society."

"I am suggesting land-to-land sewage — a method of sewage

treatment which eliminates most pollution due to sewage, increases crop yields, and is more economical for us all in the long run."

LaFollette explained that under the land-to-land process, "the sewage from a community after initial treatment is gathered in large settling lagoons from where it is pumped to fertilize and to irrigate cultivated fields."

Resistance to this type of fertilization is based on fears of damaging ground water supplies in nearby areas.

However, LaFollette notes that widespread use of this method in Europe since the 19th century and on the deserts of Israel has shown that certain soils function as natural water purifiers.

He claims that in most areas adequate acreage of suitable land is available to handle liquid sewage. In proper soil, he says, a chemical reaction reduces the contaminants by 68 to 82 percent within the first 12 inches of penetration by the liquid sewage. And by the time the liquid reaches the water table, it is totally purified.

One of the things to be careful about with this method is the

contamination of land by heavy metals or chemical poisons from industry. But this can be solved by forbidding the dumping of industrial wastes into the sewer systems of cities.

Projections of costs by planners indicates that construction of land-to-land sewage plants is considerably cheaper than expanding the chemical methods now being employed. It has been estimated that the annual per-capita expense needed for land-to-land sewage to take care of the needs of a city the size of Chicago is \$47.10 compared to \$74.80 for physical-chemical treatment.

Considering the economies this system will provide to both farmers and city dwellers, it would seem land-to-land sewage treatment merits prime attention.

The Donough family figured in sheep competition at the Lampeter-Strasburg Community fair. Shown with their prize winning animals are Tim Donough, left, his brother Edward and Edward's wife, Larue.

Lancaster Farming Photos

Fairs At Ephrata, Lampeter

Rick Pfautz, 18, Stevens RD1, captured both the champion boar and champion sow awards on Wednesday at the Lampeter Strasburg Community Fair Hog Show. He's shown here with his senior gilt champion.

Ken Garber, right, showed the senior and grand champion Guernsey at the Lampeter-Strasburg Community Fair Dairy Show on Thursday. His son Gerald is shown with his calf that took junior champion honors.

Swine show competition as seen at the Lampeter-Strasburg Community Fair on Wednesday.

Lampeter

(Continued From Page 17)

was exhibited by 11-year-old Christian.

Robert Strauss, Ephrata RD1, had the grand champion pen of three market lambs. Barbara Herr took the reserve grand champion pen of lambs ribbon.

Others winners in the various breed classes are:

Carcass lambs — Barbara Herr, second; Robert Strauss, third; Elizabeth Herr, fourth; Jennifer Polley, Narvon RD1, fifth.

Cheviot — Jennifer Polley, first.

Dorset — Barbara Herr, first and second; Luke Showalter, Akron, third and fourth; Calvin Sauder, Ephrata RD2, fifth and sixth.

Dorset Pen — Barbara Herr, first; Calvin Sauder, second; Luke Showalter, third.

Hampshire — Robert Strauss, first and third; Elizabeth Herr, second and fifth; Gary Eberly, Denver RD2, fourth and sixth.

Hampshire Pen — Robert Strauss, first; Elizabeth Herr, second; Gary Eberly, third; Melvin Weiler, Stevens RD1, fourth. Shropshire — Christian Herr, first and second, also pen. Southdown — Steve Strauss, Ephrata RD1, first and second, also pen.

Suffolk — Barbara Herr, second; Christian Herr, third; Robert Strauss, fourth.

Corriedale — Daryl Sensenig, East Earl RD1, first.

Thursday night, a crowd

gathered to watch 15-year-old J. Ronald Zimmerman walk away with the grand champion trophy in the Baby Beef Show. Zimmerman's winning entry was a 20-month-old heavyweight Angus that tipped the scale at 1200 pounds. The veteran 4-H'er is the son of Mr. and Mrs. John Zimmerman, Ephrata RD1.

Ron's younger sister, Judy, 12, also did well at the show taking the breed championship in the Hereford breed.

Reserve champion for the show was won by Kerry Boyd's crossbred entry. Kerry, Ephrata, also captured breed title with his heavyweight entry.

Judging the steer show was Conrad Grove, herdsman for Soleil Farms, Downingtown.

In Thursday afternoon's Junior Hog Show, Russel Kline, one of the county's consistent ribbon winners, showed the grand champion hog.

His entry, a 215-pound Duroc, was the top pick in a field of about 50 hogs.

Russel, 18, son of Mr. and Mrs. Vernon Kline, Reinholds, earlier this week had the grand champion Holstein at the Pennsylvania Junior Dairy Show.

The reserve grand champion of the show was taken by Mike Grube's entry, a 205-pound Crossbred. Mike resides at Lititz RD1.

Kerry Boyd, Ephrata RD1, took top honors in both the junior showmanship and junior fitting contest. Kline took the senior showmanship award while Dale

Martin, Stevens RD1, took the senior fitting event.

The results of Thursday's steer and hog shows are as follows:

STEER SHOW

Lightweight Angus — Rodney Frey, Marietta, first; Larry Frey, Marietta, second; Anne Martin, Narvon, third; Brenda Wenger, Stevens, fourth; Terry Frey, Marietta, fifth.

Heavyweight Angus — Ronald Zimmerman, Ephrata, first; Ronald Martin, Narvon, second; Bill Martin, New Holland, third; Tony Martin, New Holland, fourth.

Lightweight Crossbred — Linda High, Lancaster, first; Nancy Wenger, Stevens, second; Jeff Martin, New Holland, third; Sharon Wissler, Ephrata, fourth; Russel Kline, Reinholds, fifth; Clifford Sweigart, Mount Joy, sixth; Robert Strauss, Ephrata, seventh.

Heavyweight Crossbred — Kerry Boyd, Ephrata, first; Mike Martin, New Holland, second; Gary Eberly, Denver, third; Richard Yuninger, Marietta,

fourth; Clark Stauffer, Ephrata, fifth; Shirley Stauffer, Ephrata, sixth; Anthony Eberly, Denver, seventh.

Lightweight Hereford — Judy Zimmerman, Ephrata, first; Steve Gehman, Stevens, second; Betty Reiff, Lititz, third; Nancy Yuninger, Marietta, fourth.

Heavyweight Hereford — Linda Martin, Narvon, first; Dennis Nissley, Mount Joy, second; Wayne Huyard, Leola, third.

HOG SHOW

Chester White — Richard Bollinger, Lititz RD1, champion.

Duroc — Russel Kline, champion; Clark Stauffer, Ephrata RD1, reserve champion. Hampshire — Clark Stauffer, champion, reserve champion.

Poland China — Kerry Boyd, champion.

Yorkshire — Nelson Weaver, Ephrata RD1, champion; Mike Grube, Lititz RD1, reserve champion.

Landrace — Dale Martin,

Stevens RD1, champion; James Felpel, Ephrata RD2, reserve champion.

Crossbreed — Mike Grube, champion; Clark Stauffer, reserve champion.

FARM TRENDS (Continued From Page 1)

There's a lot of pressure now being exerted in Washington to ease the supply problem.

Many factors in the bleak outlook can't be changed. There's a shortage of rail cars. Fertilizer production facilities, running now at peak capacity, can't keep up with demand, and new plants aren't expected to increase available supply much before 1975. Higher grain prices, especially for wheat, have created an explosive demand for fertilizer on fields that were once left unfertilized. And natural gas, a raw material in the manufacture of nitrogen fertilizer, is in short supply.

Many experts are advising farmers to stock up and hold on to their fertilizer supplies because they might not be able to buy any when they most need it.

Wentink Addresses SPICE Meeting

"It may already be too late to fight overproduction in the egg industry," declared Hendrik Wentink, assistant to the president of the Pennfield Corporation, and president of the Northeastern Poultry Producers Council (NEPPCO), in addressing the annual meeting of the New York State Poultry Industry Coordinated Effort (SPICE) at Alexandria Bay, NY, on September 14.

"In cash accounting alone," he

declared, "there are enough tax savings built in for a 10 percent increase in production." He urged his audience to keep working on market demand. Pointing to Standard Brands' budget of \$4 million to introduce Egg Beater and to a recent study by the dairy industry which indicated that it takes an expenditure of 15 cents per consumer to effectively increase sales, Wentink chided the poultry industry for its "measly 1½ cents per consumer spent in only a few limited marketing areas". Too many in the poultry industry, he said, still have the 'Let George do it' philosophy and they had better wake up.

Turning to legislative and governmental issues, Wentink explained NEPPCO's support for the proposed mandatory allocation program for fuel, including butane and propane.

"I respectfully submit to you," he said, "that it is not in the interest of the consumers of the United States to forever expect our grain exports to pick up a substantial part of the bill for hauling in energy from Middle Eastern countries who know they have a hammer lock on us, are putting on the squeeze, and, if we let them, will milk us dry."

Wentink voiced the opinion that any delay in the United States developing as many alternate energy sources as possible, including the Alaska fields, would be contrary to our national interests, contrary to the interests of the consumers in general, and contrary to the interests of the poultry industry and other food processing groups.

While the poultry industry is not specifically mentioned in the Trade Reform Bill (H.R. 6767) currently before Congress, it has

tremendous implications for all of us, Wentink said. Our negotiators need a free hand to enter new negotiations, to be more flexible on policy, to bargain for increased relief from disruptive imports - especially when sold at prices lower than in the country of origin, to extend more-favored-nation treatment to imports from additional countries to encourage two-way trade, and to grant some tariff preference to developing countries so they can buy those things from us that will help make them self-sustaining.

Our industry, he stressed, has not in recent years enjoyed its fair share nor received fair treatment from our so-called foreign trading partners. They are glad to buy our grains and proteins, but when we deal in poultry, many doors are closed. Some even use our grain to feed their poultry which they then ship - at subsidized prices - into markets in which we compete. For these and many other reasons, Wentink said, poultrymen should urge their Congressmen to support H.R.

6767.

Touching briefly on the Consumer Protection Act, H.R. 21 and S. 707, the pending FDA approval of dried poultry waste as a commercial feed ingredient, and other matters, Wentink concluded by congratulating the SPICE organization for its significant increase in membership this year. NEPPCO, he said, has also just concluded a successful membership campaign that netted over 100 new

members.

"We greatly appreciate SPICE's interest in working with NEPPCO," he said, "and while our mutual effort in working out a formal agreement earlier this year did not seem entirely feasible, both our organizations gained from the experience as evidenced by the much closer ties we enjoy today. Speaking for NEPPCO, it is my hope that this relationship will grow even stronger in the future."

Penna. Hens Producing Less

Laying hens in Pennsylvania produced 289 million eggs during August according to the Crop Reporting Service. This was down one percent from production last month and last year.

The average number of layers on hand during August was 15.0 million, a two percent increase over the July number and three percent more than the number on hand last August.

The average daily rate of lay during August was 62.4 eggs per 100 layers, compared with 63.9 last month and 64.3 a year ago.

United States egg production during August was 5,402 million eggs, six percent less than August 1972 production. Layers on hand averaged 283.3 million, five percent below a year earlier. The average rate of lay during the month was down one percent from a year earlier.

"Meet The Press" Panel to Analyze Egg Stabilization Plan at NEPPCO Convention

The most serious proposal in recent years to bring stabilization to the egg industry will be analyzed in depth in a "Meet the Press" atmosphere at the 42nd NEPPCO Convention at Hershey.

Four astute trade editors will

put on the spot the chairman of the Poultry and Egg Institute of America's Shell Egg Committee, Ernest Brown, of Gibson City, Illinois.

Brown is one of more than a dozen experts on a broad range of subjects — all relating to the

outlook for "Tomorrow", the Convention theme — who will be detailing the latest in ideas and innovations for a more profitable poultry industry at the latest exposition of the Northeastern Poultry Producers Council.

Industriesmen from the 14

NEPPCOland states and adjoining areas will gather on October 30 through November 1 for the three-day Convention.

Approval of one of the most thorough plans for stabilization of the egg production economy yet proposed was given by the directors of PEIA this spring.

Brown is the dynamic general manager of Corn Belt Hatcheries of Illinois, Inc., a multi-phase operation which incorporates started pullets, contract egg production, cage housing and egg marketing. He has been very active in industry organizations and endeavors.

Facing Brown as members of the "Meet the Press" panel will be John C. Kimbark, associate editor of "Pennsylvania Farmer"; Donald Timmons, field editor for Watt Publications; Richard E. Wanner, editor of "Lancaster Farming"; and James Miller of "Feedstuffs".

The popular 14-state Convention and Exposition moves back to central Pennsylvania this

year after a four-year absence "amid a myriad of problems producers four years ago never thought they'd be confronted with," according to Hendrik Wentink, NEPPCO president.

Accordingly, in-depth seminars will be heavy on outlook, on new merchandising ideas, cost-controls, planning precision and insight into both price expectations and anticipated government regulations.

The fun-and-games aspect of the highly-favored Hershey area was not overlooked by NEPPCO officials. They have scheduled activities around the famed arboretum, the historic museum, the well-known chocolate tour, the golf courses, as well as their own banquets, parties and industry luncheons within the resort hotel itself.

Reservations or advance data for the big annual affair can be made only through the NEPPCO office at 322 Oxford Valley Road, Fairless Hills, PA 19030.

Manheim FFA To Host Childrens Barnyard At Fair

The Manheim FFA Chapter will be providing a new service during the Manheim Fair activities next week.

In an effort to acquaint off-the-farm youngsters with farm animals, FFA members will be on hand as tour guides to explain the care and feeding of livestock to groups of area students. On display will be a pony, goats, hen and chicks, cow and calf, a lamb, ducks, geese, pigeons, rabbits, a sow and litter — animals typical of the general farm scene.

The "Barnyard" tent will be located in a vacant lot on North Hazel Street, northeast of the

Manheim Junior High School. Tours have been set for Wednesday, Thursday and Friday. Any group desiring to set a time for touring may contact the vocational agriculture department at Manheim Central High School at 665-2451 by Tuesday.

The Barnyard tent will be open during the evening hours to non-tour groups. FFA members will be on hand to answer questions.

This program is a first for the county and has been encouraged by the State Fair Association as the kind of program for Farm-City relationships.

GO-CALF

the Ideal Milk Replacer
for that Get Up and Go

Go-Calf is the ideal milk replacer to use after the first four days of colostrum. Therefore, it lets you get your calf, fresh milk to market sooner and in some respects is than Mother Nature's own formula for the calf.

Adding high quality animal fat, we've increased the energy of Go-Calf. We've added the proper vitamins and antibiotics to keep your calves frisky and healthy and growing

Call Pennfield today and ask a Dairy Specialist about our highly palatable, easily soluble Go-Calf. The early growth of calves influences eventual size and capacity to produce milk that determines the size of tomorrow's milk check

Society 3 Celebrating 50th Anniversary In Usual Style

By Sally Eair
Feature Writer

Members of Farm Women Society 3 are observing an anniversary this week and they are celebrating by cooking - and cooking and cooking!!

It's their 50th anniversary of serving food to hungry fairgoers at the Ephrata Fair, and naturally their only plans are to continue to serve up some of the best platters found anywhere.

Mrs. Harold Stuber, Stevens RD1, news reporter for Society 3, says, "There won't be any champagne, but we will decorate the stand."

Mrs. Stuber, who was 11 when they started the stand, says, "cold sandwiches, apples and potato chips" were some of the earliest foods served. She said she can't remember many of the prices but she does know that hot dogs were "five or 10 cents" in those early years. She adds, "My mother dragged me along then and I've been helping ever since."

The women have come a long way since those early days and the menu for the week reads like a Pennsylvania Dutch delight: Wednesday - pork and sauerkraut, mashed potatoes, applesauce; Thursday - chicken pot pie, peas, pepper cabbage; Friday - deviled clam platter, mashed potatoes, harvard beets, cheese and macaroni and pepper cabbage; Saturday - baked ham, candied sweet potatoes, green beans and pepper cabbage. Pies, coffee and dairy drinks are also served.

In addition to the platters, there is always soup, deviled clam cakes, fried ham sandwiches, hamburgers and hot dogs available at their stand on main street.

Last year the women started a new tradition - serving breakfast on Saturday morning from 6 to 9 a.m. Hot cakes and sausage, homemade doughnuts, fruit juice and coffee are served to the early risers.

The woman who is responsible this year for seeing that the food stand is underway daily is Mrs. John Edwards, Ephrata RD1.

The Farm Women have been serving hot platters only since 1959, when they were asked to take over the job from the Schoenck Fire Company which stopped serving cooked meals because their building had been paid off, Mrs. Stuber says. Fair officials felt there should be someone serving platters on the midway, according to Mrs. Stuber, and just a few weeks before fair time the Society agreed to do it. The minutes of the Farm Women as recorded by Mrs. Stuber's mother, Mrs. Samuel Mohler, read, "Like a bolt out of the blue we are serving platters."

They established menus then, and there have been few changes since. An early menu was roast beef, potato filling and dried corn, but that was dropped.

Last year was the first time for sauerkraut, Mrs. Stuber says. She adds, "We've been serving deviled clams as long as I can

Mrs. Harold Stuber and Mrs. John Edwards and other Society 3 members were

busy stirring pots and seasoning the foods at their stand at the Ephrata Fair.

remember. It's one of our most popular items."

Along with the sandwiches, and platters, Mrs. Stuber says, soup has long been a mainstay on the menu. Homemade vegetable soup is always available. Oyster soup was served until oysters became too expensive, and ham and bean soup was also served at one time.

Even the years of World War II didn't stop Society 3. Mrs. Stuber says, "We got food stamps for

One job that never seems to be done at home can't be escaped at the Fair either - and there are mountains to be washed! Sally Snyder cheerfully pitches in.

what we needed, and we had a beef slaughtered."

She recalled that the equipment used in those early years was not quite so glamorous as that used now. They used coal oil stoves

and big iron skillets - there were no griddles, and no roof on the stand. "When it rained we would grab up our supplies and run under a roof," Mrs. Stuber (Continued On Page 28)

Society 3

(Continued From Page 26)
recalls.

All that has changed now, and the Farm Women Society's stand is the only one where hungry patrons can "come in and sit down."

Last year, the Farm Women served over 2,000 platters, plus countless sandwiches and bowls of soup. To prepare that much food is no small matter. Mrs.

Stuber says that groceries were ordered "a few weeks ago." Several women order the necessary supplies, but just a few of the items on Mrs. Stuber's shopping list include 50 pounds of coffee, two cases of ketchup, four cases of sauerkraut, eight pounds of salt, 21 pounds of macaroni, 155 pounds of chicken and 1200 clams.

Mrs. Stuber explained that the clams are bought frozen and in the shell. The Saturday before the fair members and their husbands

meet to deal with these 1200 clams. Husbands scrub them, and the women open and grind them up to be used in the cakes. They are then refrozen until time to mix up the deviled clams.

According to Mrs. Stuber, "Two mainstays of the Society, the Misses Mary and Ada Royer, for many years made the deviled clam cakes at their home." These two charter members, who reside at Ephrata RD2, now assist Mrs. Robert Gregory in making the clam cakes.

The pepper cabbage is also prepared by members on

year. They give to charities of all kinds, contributed to the Ephrata Library, furnished a room for the Ephrata Hospital and participate in the county Farm Women activity which this year is the Welsh Mountain Clinic. The money is also used to entertain the husbands who work so hard at the fair, and the children at a Christmas party, according to Mrs. Stuber.

Mrs. Stuber, who is also a director on the Fair Committee and in charge of general exhibits, says, "I feel the fair is a good thing for the community because it gives organizations an opportunity to earn money for their projects. The Fair association itself doesn't make a lot of money - expenses are terrific - and they buy and maintain a car for the

hospital and for the recreation center. The advertising and publicity which it gives to Ephrata is an asset to the community."

Mrs. Stuber has been in charge of exhibits since 1945 when she "went and stayed," having taken over the job from her mother. In her opinion the fair has gotten bigger, especially since Tent City was added about 10 years ago. She said, "People used to come just in the evening, but now there are people there all the time." She said she enjoys her work primarily because the people she works with are "marvelous."

Have you done your part to help the farm women celebrate their 50th anniversary? They'll do the cooking - all you have to do is the eating.

The Society 3 food tent at the Ephrata Fair is a popular place.

Phone 717-859-1127

Saturday preceding the Fair and the Monday before the Fair they gather to cook the chicken for chicken pot pie. Mrs. Stuber says they buy legs and breasts for the pot pie.

The only problem posed by the uncertain food situation at the present time is that the Farm Women, while assured of sufficient supplies, could not establish a price for their platters in advance of the Fair.

When asked how many people it takes to run the stand, Mrs. Stuber replied, "All that we can get."

She said members, husbands, children and other relatives of members all pitch in to run the stand during fair week. There are five people needed in the kitchen and 16 waitresses to serve patrons. She said many working members stop by during their lunch hour to help.

Husbands play a big part because they build the stand on Monday evening and take it down around midnight on Saturday. Many help in the stand. "My husband is a marvelous dishwasher," Mrs. Stuber said.

The food stand is the Society's only money-making project each year. The money is used for all the society's programs during the

About Pattern Pollution

Today's emphasis on ecology has made us aware of all forms of pollution. But perhaps you're unaware of "pattern pollution" in your own home.

With so many home furnishings sporting brightly colored patterns, you can easily fall victim to pattern pollution. Geometrics, plaids, abstracts, florals and stripes can get jumbled together to cause panic instead of pleasure.

Each time there is change of color, line, form and strongly contrasting textures, pattern is formed. Individual items may be attractive, but what will the total picture be with patterns on the floor, walls, furniture and decorative accessories?

There are several guidelines to follow in interior design to avoid "PATTERN POLLUTION." First, let one pattern be dominant over all others. And avoid using too many patterned fabrics in one room.

About one-fourth to one-third of the total surface area in a room is enough to treat with pattern. More than this becomes confusing. But little or no pattern in a room makes it dull or uninteresting.

Color blending is important in typing together all the patterns in a room. Also, avoid great textural differences. They tend to divide the area.

Look around your home. Is the decor pleasing to people who live there—or is your decor an example of "pattern pollution?"

Fashionable Towels

May Cost More

When you shop for towels today, you have to decide whether fashion is worth the extra cost. Once price served as a good guide to wearing quality. But towel prices today include the added cost of fashion in the form of elaborate designs, textures and prints.

Plain terry towels with loops on both sides of the fabric come in a wider variety of weights and colors than ever before. And you'll also see dobby-weave towels that contain simple, woven-in designs in a geometric pattern. Towels with elaborate woven-in designs that are reversible and look embossed are known as jacquard-weave towels. Screen-printed towels offer

variety in design. Manufacturers use plain terry towels and print designs on one side only.

The velvety look and feel of some terry towels results from shearing the pile. The sheared terry towels presently available come sheared on one side only while the other side retains its loops. When manufacturers first introduced the "velvet look" to the towel market, both sides of the terry towels were sheared. However, many consumers complained that the towels didn't absorb water satisfactorily.

To satisfy the consumer's demand for absorbency, manufacturer's decided to shear one side only, leaving the terry loops on the other.

If you consider towels to be an important part of your bathroom decorating scheme, you may find the cost of fashion worth the extra expense.

Fall Income Tax Workshop

The Pennsylvania State University Extension Service will hold a three day workshop October 16-18 at the Lancaster Farm and Home Center, Lancaster, for individuals wishing to either start income tax returns or to improve their current skills.

Over half of all tax returns are prepared by someone other than the taxpayer according to Internal Revenue Service sources.

The course is designed for individuals who wish to improve their income and perhaps help others do the same. No prior knowledge is necessary.

The workshop covers the preparation of Schedule F-Forms; C-Small business, 1040 and 1040A, individual, social security, deduction, and exemptions.

Instruction will be given by professor Wayne Kelly and assistant professor Jesse Cooper, both Extension agricultural economists at Penn State. They have been teaching tax preparation courses for several years.

Recipe Exchange . . .

Home On The Range

The comments made by readers of the Recipe Exchange have been heartwarming and encouraging. Your comments telling how much you enjoy the Exchange are always most welcome. Readers tell us they've gotten recipes they've been wishing for for years; that these are the down-to-earth recipes they want which just aren't found in many cookbooks; that the ingredients are those we keep on hand without needing to make a trip to the store before trying a new recipe. And we could go on and on.

You are the ones who have been responsible for making the Exchange a success. Women and swapping recipes seem to go together like salt and pepper, bread and butter...

And to keep the Exchange going, we need your replies. Won't you take time to send in a contribution. Send your choice to: Recipes, Lancaster Farming, Box 266, Lititz, PA 17543. We'll send a colorful potholder your way to show our appreciation to a group of great readers.

Leola

xxx

Frank Sandwich

3 frankfurters, cut in slices
1 medium onion, cut up
Put together in frying pan, adding a little water and butter. Put on low heat until onions and franks are lightly browned and tender, about 20 minutes. Fills 6 doggie buns.

Mrs. Esther Fisher
RD1
Paradise

xxx

Molasses Cookies

Cream together:
2 cup shortening (if lard is used, use scant cups)
1 cup brown sugar
3 cups sorghum molasses
Add:

2 tablespoons soda to
2 cups sour milk or sweet milk with 1 tablespoon vinegar
Stir well and add:
8 cups of flour with
1/2 teaspoon ginger
1 teaspoon cinnamon
Drop by teaspoons on ungreased cookie sheet and bake 20 minutes at 300 degrees.

May be topped with coconut or ground peanuts before baking.
Makes six dozen large cookies.

xxx

The Best Gingerbread

1/2 cup butter or shortening
1/2 cup granulated sugar
1 egg, beaten
2 1/2 cups flour, sifted
1 1/2 teaspoons soda
1 teaspoon cinnamon
1 teaspoon ginger
1/2 teaspoon cloves
1/2 teaspoon salt
1 cup molasses
1 cup hot water
Cream shortening and sugar.
Add beaten egg.

Measure and sift dry ingredients. Combine molasses and hot water. Add dry ingredients alternately with liquid, a small amount at a time, and beat after each addition until smooth.

Bake in paper lined pan 9x9x2 in moderate oven (350 degrees) for 45 minutes. Yields 16 portions.

Miss Lucy S. Brubaker
RD1
Denver

xxx

Fruit Cake

1 1/2 cups sugar, brown or white
2 eggs
1/2 cup vegetable oil
2 1/4 cups regular flour
2 teaspoons soda
1/2 teaspoon salt
2 cups fruit (just fruit, no juice), or applesauce (not too thick)
Mix well and bake at 350 degrees for 45 minutes.

Icing

1/4 pound butter
3/4 cup granulated sugar
1/2 cup evaporated milk
Combine and bring to a boil. Boil hard one minute. Remove from heat. Add 3/4 cup chopped nuts and 1 teaspoon vanilla. Put on cake while still warm.

Mrs. Samuel M. Stoltzfus
RD1
Christiana

Red Beet Cake

Cream:

1 1/2 cups sugar
3 eggs
Add:
1 cup salad oil
1 1/2 cups red beets, blended
2 squares chocolate, or 2 packages chocolate bits, melted

Sift:

1 3/4 cups flour
1 1/2 teaspoons soda
1/2 teaspoon salt
Add to mixture:
1 teaspoon vanilla
Bake at 325 degrees 40 to 45 minutes.

Miss Alice Newswanger
RD1
Narvon

xxx

Carrot Gold Cake

2 cups sifted flour
2 teaspoons baking powder
1 1/2 teaspoons baking soda
1 teaspoon salt
2 teaspoons cinnamon

4 tablespoons vinegar
½ teaspoon salt

Cook syrup, then let cool. Cut cantalopes in chunks. Pack in jars and add syrup. Cold pack 20 minutes.

Mrs. Amos Burkholder
RD1
Mifflinburg

xxx
Eggplant Supreme
1 medium eggplant
2 tablespoons margarine
2 tablespoons flour
1 cup milk
½ cup grated cheddar cheese
2 tablespoons finely chopped onions

¾ cup soft bread crumbs
1 teaspoon salt
2 egg yolks, well beaten
2 egg whites, stiffly beaten
½ cup crushed potato chips

Pare eggplant and cut into small pieces. Cook in a small amount of water until tender, about 15 minutes. Then drain.

Melt margarine and blend in flour to a smooth paste. Gradually add milk, stirring constantly, until smooth and thickened. Remove from heat. Blend in cheese until melted. Mix in eggplant, onion, bread crumbs, salt and egg yolks. Fold in whites. Turn into greased baking dish and top with chips. (Buttered

bread crumbs may be used instead of chips.)

Place in a pan of hot water and bake at 350 degrees for about 50 minutes, or until browned and firm.

My garden doesn't know when to quit. (Maybe it is I who don't know when to quit.) People tell me their vegetables are all harvested; but as I keep replacing all summer, there are several bean and sweetcorn rows that haven't been harvested as yet.

The sweet potatoes and peanuts must be dug, carrots, beets and turnips put in the cellar, baskets of squash to be picked, celery blanched with tile, endive, swiss chard and peppers to freeze. This year for the first time I've raised edible green soybeans. Most of them are frozen but some dry ones remain on the stalks as we want to try them that way also. The staked tomatoes are still beautiful and I hope the late purple cabbage and cauliflower will develop.

xxxx
We got a good supply of honey this year and I've just finished straining it and bottling it for Jeffrey, my son.

Before he left for Penn State, he and Judy extracted it and then told me it was now all mine to

tend. Judy is studying typing this year so I had her type the labels.

It is nice to hear the price is a little higher than it was eight years ago when as a 4-H'er he got his first hive from Winthrop Merriam, a former assistant County agricultural agent.

xxxx
Our daughter, Nancy, who lives near Seattle, Wash., tells me she had a wonderful vacation in Glacier National Park in Montana near the Canadian border. She hiked 10 miles around a glacier-fed lake and saw breathtaking scenery — jagged snow fringed mountains and alpine wildflowers in high meadows. She then camped south until she reached Sun Valley, Idaho.

Oh, to be young and travel across the country again.

Farm Women Societies

Society 29

Farm Women Society 29 met recently at the home of Mrs. Gerald Kreider, Quarryville RD1. Mrs. Kathryn Frey gave a demonstration on decoupage, demonstrating each step as she explained the technique. Following Mrs. Frey's talk, the hostess Mrs. Linda Kreider and cohostess Mrs. Sharon Heistand served refreshments. The business meeting followed.

The program committee was named for the coming year as follows: Mary Ellen Adamire, chairman; Sharon Heistand, Carolyn Newcomer, Janis Drager, Bonnie Becker and Shirley Garner.

Election of the offices of secretary and treasurer followed. New secretary is Lois Wells, and Mary Herr is treasurer.

The next meeting will be entertaining the Philhaven Hospital patients October 22. The Society

women are to meet at the Trust Company Bank in Elizabethtown at 6:15 p.m.

Society 30

Farm Women Society 30 elected Mrs. Reuben Leiset as president during a recent meeting. Serving with Mrs. Leiset will be Mrs. Dale Herr, vice-president; Mrs. Larry Weaver, secretary; Mrs. Duane Hostetter, treasurer, and Mrs. Wilmer Musser, song leader.

The next meeting of Society 30 will be held at 7:30 p.m. October 15 at the home of Mrs. James Byler, Gap RD2.

Forget-Me-Nots United Way Campaign Theme

The Forget-Me-Not is the theme of the 1973 United Way Campaign. The flower's blue petals and yellow center identifies all materials being used in the campaign. A small fabric Forget-Me-Not is being worn by all who contribute.

A Day of Country opens the drive on Saturday, September 29 at 1 p.m. at Long Park.

John S. Falconer, Campaign vice-chairman, will introduce these performers: Lancaster's Harv Owen, a vocalist known for his appearances with the Bob

Troxell Jazz Band; Buck Ford, a country-folk-rock singer from Denver, Colo., who is a favorite on-campus drawing card; the female folksinging duo of Mary Flowers and Katy Moffatt; also of Denver and the local country-rock sound of Big River, a group featuring the tenor of James Beal, star of the Lancaster Opera Workshop's "La Traviata," William Burr on lead guitar, J. Robert deVitry on rhythm guitar, Richard Smith on bass guitar, Roger Wolfspurger on drums and Shiloh Cain, leader, as second lead guitarist.

The United Way's Day of Country will be capped later in the day with a benefit concert; introduced by William F. Tell, general chairman, and starring the Earl Scruggs Revue at Maysers Gym, Franklin and Marshall College, at 8:30 p.m. In addition to Earl Scruggs who, with Lester Flatt took the country by storm with their "Bonnie and Clyde" hit, "Foggy Mountain Breakdown," the revue will feature Scruggs' sons Randy, Gary and Steve, Jody Maphis and Josh Graves.

Tickets for the benefit concert at F & M are now on sale at Stan's Record Bar, Camelot Music, The Male Bag, Mosemann's Ticket Agency, the switchboard at F & M and the United Way offices at

COOKING FOR ONE

Living alone and cooking for one person raises unique problems. A friend of mine recently experienced this while his wife went to Europe for a three-week holiday. It had been years since he had really taken care of the nominal household chores. He quickly found out that they are time-consuming, leaving little time for leisure when coupled with his normal working day.

Well, this is the problem all people have who live alone and also work. They have to be well organized to enjoy more than mere existence. There's the laundry, the picking-up and generally keeping one's quarters clean, there is garment cleaning and most of all — there is shopping for and the preparation of food. One cannot, after all, eat out all the time. Nor, did my friend want to.

Problems In Shopping

The biggest problem in shopping is quantities. In canned goods there are many small-can items. But even these contain more than one serving. Thus the user must plan when he will use the leftovers. Soon enough that the food will still be all right yet not, for the sake of variety, the

very next day.

Meat can be divided into portions and frozen. Frozen vegetables can be cut apart so one needs to cook only enough for one meal, leaving the rest frozen and in the freezer. Staples such as milk, eggs, butter, bread are easily portioned out for daily needs. The foils and plastic wraps are marvelous for storing leftovers in the refrigerator.

My friend says his recent experience indicates a major problem in variety. It was monotonous to fully utilize all the food he had bought. He simply could not escape similarity of menu if he was to avoid throwing food away.

Invite A Friend

It occurs to me that people who live alone want and need company anyway. Perhaps one way not to waste food and at the same time gain companionship is to invite a friend over. And, obviously, eating out is the way to occasionally treat yourself to a real change of scene.

So many older people live alone. Unless their physician has prescribed a special diet, they need the same balance of foods that we all do, but probably they need smaller portions.

Milk and its products, meat, poultry, eggs, fruits and vegetables, whole grain or enriched breads and cereals are the foods we are talking about. And these should be consumed at a calorie level that keeps people at the right weight, just enough and not too much.

Hog Cholera Advisory Committee To Meet

The U.S. Department of Agriculture (USDA) has announced that the Secretary's National Hog Cholera Eradication Advisory Committee will meet at 9 a.m., Monday, Oct. 15, at the Sheraton-Jefferson Hotel in St. Louis, Mo.

The meeting will take place in conjunction with the 77th Annual meeting of the United States Animal Health Association (USAHA) which will continue through the week.

Officials of USDA's Animal and Plant Health Inspection Service (APHIS) said the purpose of the committee is to advise and counsel the Secretary of Agriculture concerning measures to eradicate hog cholera from this country.

The cooperative state-federal hog cholera eradication program began in late 1962 and is coordinated by APHIS. Forty six states are now classified as "hog cholera free."

The committee consists of 12 members from various regions of the country and includes swine producers, Market operators, private and government veterinarians as well as representatives of the scientific and academic communities. Chairman is Dr. Francis J. Mulhern, administrator of APHIS.

The meeting will be open to the public. Interested persons who cannot attend may file comments before or after the meeting by sending them to the APHIS Deputy Administrator for Veterinary Services, USDA, Washington, D. C. 20250.

Official notice of the meeting appeared in the September 19 issue of the Federal Register. Comments on the proposal will be available for public study.

Services Available For Visually Handicapped

The Pennsylvania Bureau for the Visually Handicapped reported that its stepped-up campaign to find and help people who have sight problems is bringing good results.

The Bureau, an agency of the Department of Public Welfare, launched the expanded program, a three-year effort, during 1972, relying principally upon the mass media—newspapers, radio and television—to spread the word as a public service.

During the past year, according to Ralph E. Beistline, director, the campaign, known as "Project Vision" turned up 1,075 referrals.

"We are delighted with the response," Beistline declared, "and are most appreciative of the way the newspapers and radio and television stations around the State have pitched in to help."

However, Beistline emphasized that the Bureau still has a big job ahead of it.

"There are additional thousands of Pennsylvanians whose vision has been impaired and who either are unaware of the services available to them or do not realize they are eligible for help," he said. "And there are probably thousands more who feel that they are in a hopeless situation and simply never get around to seeking the help that could make such a difference in their lives."

"The help available from the Bureau for the Visually Handicapped is available to all Pennsylvanians, regardless of age, race, sex or creed. An important thing to remember is that a person need not be totally blind to qualify. Anyone with a sight impairment, whether through injury, disease or other causes is urged to contact the Bureau."

The Bureau program covers a broad spectrum of services, including counseling, home

Loan Program Rates Increased

The loan interest rate in the U. S. Department of Agriculture's farm storage and drying equipment loan program is being raised to reflect increased borrowing costs of money to Commodity Credit Corporation (CCC). The interest rate will be increased from 6.0 percent, to 8.75 percent, per annum, computed on a daily basis.

In addition, the amount of down payment required by borrowers is being raised from 15 to 30 percent because of the accelerated pace at which on-farm storage is being added. The changes were effective for loan applications filed on or after September 17, 1973.

The changes are designed to maintain program activity at a level which will more nearly reflect the current storage situation rather than the situation that has prevailed over the past several years, and they should result in a reduction of federal government expenditures in fiscal year 1974, the department explained.

Under the farm storage and drying equipment loan program farmers can secure CCC loans to finance on-farm storage and drying facilities needed for grain and other commodities. Record use was made of the program during fiscal year 1973 when 41,046 loans were made for \$156.6 million representing more than 313.5 million bushels of storage capacity.

Storage and equipment loans have been available since 1949.

teaching for blind adults, training and rehabilitation. The work may be carried out in the home, on a job, at school, or wherever circumstances dictate. Some services are free, others are based on the individual's ability to pay.

Anyone knowing of visually handicapped persons who might benefit from the Bureau's help is urged to send the names and addresses to Vision, Post Office Box 2675, Harrisburg, Pa., 17120.

Milk Protein Snack Gets National Distribution

"Moo Munchies," a high protein snack made from nonfat dry milk and dry whey, is moving into national distribution in health food stores following introduction at the National Nutritional Foods Association meeting in San Diego.

Developed in cooperation with Dairy Research Inc. (DRINC), the producer-financed product and market development organization, "Moo Munchies" are manufactured by Superior Protein Products Co., of Gardena, California.

An "all natural high protein snack," the new product is made by a special process that avoids cooking, baking and frying. The crisp snacks are low in fat, contain no starch, additives or preservatives, but have all the benefits of milk protein nutrition.

Originally tested in Los Angeles area health stores, "Moo Munchies" are now being marketed in new colorful one and three ounce cellophane packages. Among the four available flavors, toasted onion and herb butter are the most popular.

Nutritional labeling on the package indicates that a single ounce provides 38 percent of minimum daily requirement for calcium, 30 percent for phosphorus, 36 percent for riboflavin and 8 percent for thiamine.

The new packages were displayed by DRINC at the September 17-18 meeting of United Dairy Industry Association at the Hyatt Regency O'Hare in Chicago.

The Egyptians wrote algebraic equations in hieroglyphics about 3700 years ago.

A Better Way

TO SAVE YOU TIME AND MONEY

HOW TO AVOID UNNECESSARY SERVICE CALLS

Service calls on most appliances can be minimized by following these two simple rules.

First learn all you can about your appliance. The owner's manual is your textbook, read it carefully and keep it handy, the salesman and service technician are your teachers. Ask questions.

Second, check a few simple items before you call a technician.

1 Electric cord Is it plugged in?

2. Pilot light. Is it lit? Check your owner's manual before trying to light it.

3. Power source. Has a fuse blown or a circuit breaker moved to the off position?

4 Controls Are they set correctly? Be positive by checking your owner's manual. Give pushbuttons an extra firm push and turn dials in the proper direction.

5 Lights If not on, check the power source. If the bulb's burned out, your owner's manual will tell you the type of bulb needed for replacement.

6 Dust, lint and dirt buildup. This reduces efficiency. Washer

filters (if not self-cleaning) and dryer lint screens need to be cleaned after each use.

Dust and dirt can block your air conditioner filter. Check your owner's manual for instructions on changing or cleaning the filter. Dust and dirt will also build up on the coils, back and beneath refrigerators and freezers. They should be cleaned periodically with a brush or vacuum cleaner attachment.

7. Water Supply. Is water flowing into the appliance? Be sure faucets are turned on and hoses not kinked.

9. Doors and latches. Are they properly closed?

If you've made the basic checks and read your owner's manual and the appliance still doesn't operate correctly... it's time to call for help.

But don't call any fix-it man down the street. Get the job done right. Call your dealer and ask him to recommend a manufacturer's authorized service technician or contact the manufacturer directly.

National Angus Tour Oct. 5-9

Over 300 of the Angus breeders and beef industry leaders in 16 nations will study the beef industry in the heartland of the United States and take a close look at some highly productive and interesting cattle country on the 100th Anniversary National Angus Tour October 5-9, Lloyd D.

Miller, executive secretary of the American Angus Association reports.

The tour is sponsored by the American Angus Association in cooperation with the Missouri, Kansas and Oklahoma Angus Associations. The purpose of the tour, said Miller, is to show cattlemen leading herds of commercial and registered Angus, to study new methods used by today's feedlots and meat packing houses and to see some of the world's best grassland. There will also be stops at two outstanding Quarter Horse outfits plus three other special events.

The first stop will be in St. Joseph on October 5 for the First Day of Issue ceremonies of the 8 cent commemorative Angus postage stamp being issued by

the U. S. Postal Service. There also will be a tour of the American Angus Association headquarters. The last stop on the tour will be at the National Cowboy Hall of Fame in Oklahoma City, and on Monday the group will visit Woolaroc Museum near Bartlesville, Oklahoma.

After the stamp ceremonies the group will go to Kansas State University at Manhattan. Among the attractions at the University will be a chance to see one of the nation's oldest Angus herds, started in 1881. There will be a talk by Dr. Donald Good, head of the animal husbandry department on "The Beef Explosion in the Great Plains" on Saturday, October 6.

The tour will then head out through the Kansas Flint Hills and the Blue Stem of the Osage of Oklahoma.

The tour will be made entirely by chartered bus. The public is invited to take part, but room and meal reservations will be made only for those people who made advance reservations for the tour and who ride the busses.

Lancaster Farming, Saturday, September 29, 1973—37

State Convention To Climax Grange Centennial Celebration

More than 2,000 delegates are expected to attend the 101st annual convention of the Pennsylvania State Grange which will be held in Reading October 22-25, according to A. Wayne Readinger, state master.

The Convention climaxes the year-long centennial celebration of the State Grange and marks the beginning of "a new century of service to the agricultural and rural communities of Pennsylvania," Readinger said. Action by the delegates will focus attention on key issues and problems facing farmers and farm production in the years ahead, the state master added.

Governor Milton J Shapp has accepted an invitation to address the convention Tuesday afternoon (Oct. 23).

Other speakers will be: John W. Scott, master of the National Grange; Dr. Russell E. Larson, provost of Pennsylvania State University; Rep. H. Francis Kennedy, chairman of the House Agriculture and Dairy Committee; State Agriculture Secretary James A. McHale, Mrs. George Grobusky, flora of the National Grange and the National Grange's representative to the convention and George Grobusky, master of the South Carolina Grange.

Also on the program will be B. McClain Cochran, general secretary of the Pennsylvania Sabbath School Association, and Rev. David Grimm, of the Pennsylvania Council on Alcohol Problems.

Highlighting activities at the convention will be talent contests, musical competition for family vocal and instrumental groups, and finals in the youth ritual and Grange procedure contest. Fifth and sixth degrees of the Grange will be conferred on large classes Wednesday afternoon and evening, Oct. 24.

Pennsylvania's Granger of the Year - Joseph Hartle, Jr., of Bellefonte RD4 - will be honored at the Thursday morning session.

Climaxing the convention will be an historic pageant, "Extravaganza," to be presented Thursday evening. Its theme, "between today and tomorrow," will focus attention on the changes and the progress of the Grange in its new century of service.

The pageant was written and is being directed by the Centennial Committee headed by Miss Mildred Shultz, of Somerset, chairman of the lecturer's committee of the State Grange.

YAZOO MASTER MOWERS

Replaces Belly-Slung Mowers

The Yazoom Rider is already well known to commercial cutters. They bought twice as many this year as last. Why are we telling residential owners about it? Because the YAZOO RIDER actually costs less than well-known "homeowner" brands of belly-slung tractor mowers. It comes in 60", 48" and 42". In residential use it should last a lifetime!

Egg Grade and Grading Regulations Updated

An updating of U.S. grade standards for shell eggs and the regulations used in the voluntary federal-state egg grading service was announced by the U.S. Department of Agriculture (USDA). The changes announced are nearly identical to those proposed by USDA in the August 3 Federal Register (USDA Press Release 2371-73). Most comments favored their adoption.

Effective October 29, the revised standards will no longer include as a quality grade factor the movement of the air cell within the egg. Research has shown that, contrary to past belief, there is no correlation between movement of the air cell and egg quality. Size of the air cell, which is a quality indicator, however, is retained as a grade factor.

Under the revised standards, a tolerance of .03 percent—three eggs per thousand—is allowed for eggs with shell and interior defects impossible to detect in modern mass handling methods. The tolerance applies equally to consumer grades sold through retail outlets and procurement grades sold to institutions.

In addition, the tolerance in the procurement grades for "checks"—eggs with cracked shells but with their inner membranes intact—has been raised from three to five percent. This makes the tolerance for checks in the procurement grades equal to that already in effect for the consumer grades.

These changes were made necessary by modern high-speed, high-volume egg packing operations.

At the request of the egg industry, a definition of "nest run eggs" is added to the standards. Nest run eggs—defined as eggs which have not been washed, graded, or sized—are eligible for a type of USDA grading designed to anticipate their yield grade.

A change in the regulations governing plants using USDA's voluntary egg grading service requires that water used to wash eggs contain no more iron than two parts per million. Plants

using water with excessive iron content will be required to install equipment to reduce the level, since research has shown that eggs washed in water containing an excessive amount of iron are more susceptible to spoilage.

The updated standards and

regulations were scheduled for publication in the September 26 Federal Register. Copies may be obtained from the Poultry Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Harvests Progressing

Most pastures in the Commonwealth are considered in fair condition as soil moisture in all regions has been reported adequate or surplus by the Pennsylvania Crop Reporting Service.

The service reports fourth cuttings of alfalfa in some parts of the state, and second cuttings of clover-timothy in three-fourths of the state. Quality of hay made during the last week of September is considered one half fair, and the rest divided between good and poor.

Corn is maturing rapidly and should soon be safe from frost, according to the service. The quality and yields appear to be good.

The oats harvest is virtually complete. About one half of the barley and one fourth of the wheat have been planted. However, some farmers are reporting a shortage of fertilizer that is causing planting delays.

Peach harvesting has been completed and the apple harvest is in full swing, though reports indicate the crop may be short of expectations.

The potato harvest is one half completed, with yields and quality expected to be good.

However, the harvesting of other vegetables—snap beans and tomatoes—is running below average in supply.

**Southern Lancaster County's
fastest-growing bank
has grown its first branch!**

Grand opening

**of the Penn Hill office of
Farmers National Bank of Quarryville**

(Routes 272 and 222, Peach Bottom)

Wednesday, Thursday and Friday, Oct. 3, 4 and 5!

We've laid the foundation, placed brick upon brick. And now we're ready to show you the newest, finest banking facility around: The Penn Hill office of Farmers National Bank of Quarryville, located at the intersection of Routes 272 and 222, Peach Bottom.

Come join us Wednesday, Thursday and Friday—October 3, 4 and 5—for our big, great-fun grand opening!

On Wednesday morning, for visitors (18 and older) who arrive first, there'll be a \$100 giveaway. That's right! The first five persons to enter our front door will receive \$10 each, the next five will be given \$5, and the next 25 in line, \$1.

Thereafter, on all three days, we've got much more for you.

We've got free gifts. Free refreshments will be served. Persons opening a savings or checking account with a minimum \$50 deposit, and those adding \$50 and up to an existing account, may

choose either a thermal blanket, an alarm clock, a socket tool set, or a battery-operated lantern.

And, for kiddies 6 and under, we've got helium-filled balloons—this, plus something even livelier. Each child may dip one hand into

our Penny Pot, and pull out the biggest fistful of coins he can get!

So plan on visiting us. Southern Lancaster County's fastest growing bank has grown its first branch. Come grow with us!

Here's what you'll enjoy at our big grand opening!

- \$100 given away to first-arriving visitors (18 and older) on Wednesday morning!
- Free refreshments and gifts!
- Desirable premiums for persons opening a savings or checking account with \$50 min-

imum deposit, or adding \$50 to an existing account!

- A free fistful of pennies and helium-filled balloon for each child 6 and under!

Farmers National Bank of Quarryville

Banking the way you'd do it.
